Bihar and Mithila J. Albert Rorabacher, 2016-09-13 The struggling states of Bihar and Mithila serve as extreme examples of India s problems Development here has been thwarted by a hereditary landed aristocracy supported by religion casteism custom social stratification tradition and patterns of behaviour that can be traced back millennia In turn all these have been masterfully manipulated by co opted politicians who have turned politics into a veritable art form as this volume comprehensively demonstrates Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Afghanistan Nepal Bhutan Bangladesh and Sri Lanka

China's Peasant Agriculture and Rural Society Jan Douwe van der Ploeg, Jingzhong Ye, 2016-05-20 China s agriculture and rural society has undergone rapid changes in recent years Many poorer farmers and younger people have moved to cities and yet China has an immense challenge to feed a growing and more affluent population This book provides a bottom up view of China s agriculture showing how the many millions of Chinese peasants make a living It presents a vivid description of the mechanisms used by rural households to defend and sustain their livelihoods increase their agricultural production and improve the quality of their lives The authors examine the newly emerging trajectories of entrepreneurial and capitalist farming and assess whether such alternatives will be able to meet the enormous social economic and environmental challenges that China faces The book also explores the paradigm that has underpinned the organisation and development of China s agriculture from ancient times to the present day This shows the importance of balancing in the Chinese model as compared to the one sided imposition of continual modernization in the western model It is argued that such balancing is at the core of the current Sannong policy referring to the three ruralities of food sovereignty wellbeing for peasant households and an attractive countryside

10 Solved Papers of IBPS Clerk Prelim & Mains Exams (2015-19) Disha Experts, 2020-09-04 *Frontiers of Sulfur Metabolism in Plant Growth, Development, and Stress Response* Stanislav Kopriva, Dibyendu Talukdar, Hideki Takahashi, Rüdiger Hell, Agnieszka Sirko, Stanislaus F. D' Souza, Tulika Talukdar, 2016-09-07 Growing plants have a constitutive demand for sulfur to synthesize proteins sulfolipids and other essential sulfur containing molecules for growth and development The uptake and subsequent distribution of sulfate is regulated in response to demand and environmental cues The importance of sulfate for plant growth and vigor and hence

crop yield and nutritional quality for human and animal diets has been clearly recognized. The acquisition of sulfur by plants however has become an increasingly important concern for the agriculture due to the decreasing S emissions from industrial sources and the consequent limitation of inputs from atmospheric deposition. Molecular characterization involving transcriptomics, proteomics and metabolomics in *Arabidopsis thaliana* as well as in major crops revealed that sulfate uptake, distribution and assimilation are finely regulated depending on sulfur status and demand and that these regulatory networks are integrated with cell cycle, photosynthesis, carbohydrate metabolism, hormonal signaling, uptake and assimilation of other nutrients etc to enable plant growth, development and reproduction even under different biotic and abiotic stresses. This knowledge can be used to underpin approaches to enhance plant growth and nutritional quality of major food crops around the world. Although considerable progress has been made regarding the central role of sulfur metabolism in plant growth, development and stress response, several frontiers need to be explored to reveal the mechanisms of the cross talk between sulfur metabolism and these processes. In this research topic, the knowledge on plant sulfur metabolism is reviewed and updated. Focus is put not only on molecular mechanisms of control of sulfur metabolism but also on its integration with other vital metabolic events. The topic covers 4 major areas of sulfur research: sulfate uptake, assimilation and metabolism, regulation and role in stress response. We hope that the topic will promote interaction between researchers with different expertise and thus contribute to a more integrative approach to study sulfur metabolism in plants.

Political Ecologies of Meat Jody Emel, Harvey Neo, 2015-05-15. Livestock production worldwide is increasing rapidly in part due to economic growth and demand for meat in industrializing countries. Yet there are many concerns about the sustainability of increased meat production and consumption from perspectives including human health, animal welfare, climate change and environmental pollution. This book tackles the key issues of contemporary meat production and consumption through a lens of political ecology which emphasizes the power relations producing particular social, economic and cultural interactions with non-human nature. Three

main topics are addressed the political ecology of global livestock production trends changes in production systems around the world and their implications for environmental justice and existing and emerging governance strategies for meat production and consumption systems and their implications Case studies of different systems at varying scales are included drawn from Asia Africa the Americas and Europe The book includes an editorial introduction to set the context and synthesize key messages for the reader
