Wisdom as a Way of Life Steven Collins,2020-07-07 This wide ranging and powerful book argues that Therav da Buddhism provides ways of thinking about the self that can reinvigorate the humanities and offer broader insights into how to learn and how to act Steven Collins argues that Buddhist philosophy should be approached in the spirit of its historical teachers and visionaries who saw themselves not as preservers of an archaic body of rules but as part of a timeless effort to understand what it means to lead a worthy life He contends that Buddhism should be studied philosophically literarily and ethically using its own vocabulary and rhetorical tools Approached in this manner Buddhist notions of the self help us rethink contemporary ideas of self care and the promotion of human flourishing Collins details the insights of Buddhist texts and practices that promote the ideal of active and engaged learning offering an expansive and lyrical reflection on Therav da approaches to meditation asceticism and physical training He explores views of monastic life and contemplative practices as complementing and reinforcing textual learning and argues that the Buddhist tenet that the study of philosophy and ethics involves both rigorous reading and an ascetic lifestyle has striking resonance with modern and postmodern ideas A bold reappraisal of the history of Buddhist literature and practice Wisdom as a Way of Life offers students and scholars across the disciplines a nuanced understanding of the significance of Buddhist ways of knowing for the world today

New Zealand English Grammar – Fact or Fiction? Marianne Hundt, 1998-07-15 New Zealand English NZE is one of the younger post colonial varieties of English It is therefore not surprising that previous research focused on lexical and phonological aspects of NZE and practically neglected grammatical peculiarities New Zealand English Grammar Fact or Fiction presents a careful comparative analysis of parallel corpora of New Zealand British American and Australian English in order to single out morphological syntactic and lexico grammatical features typical of an emerging New Zealand standard In addition to corpus data on regional variation the author uses data on short term diachronic change within British and American English to show how regional variation is closely related to both stylistic variation a world wide colloquialisation of the written norms of English and ongoing linguistic change leading to temporal regional differences NZE is different from other national varieties of English in terms of preferences for certain variants rather than categorically different grammatical rules Nevertheless it is a standard in its own right in so far as it is a typical mix of variants available in World English The methodological approach combines both qualitative analyses and statistical evidence The question in how far statistically significant differences in word frequencies can be shown to be linguistically significant is also relevant for other quantitative research into emerging national standards
