Energy Efficiency in Air Transportation Arturo Benito, Gustavo Alonso, 2018-06-23 Energy Efficiency in Air Transportation explores the relationship between air transportation and energy use starting with an analysis of air transport energy sources and their potential development The book examines how different elements of the air transport system make use of energy with an analysis of various methods for optimizing energy consumption The book covers the consequences of energy use in terms of economics environmental impact and sustainable development with a review of the existing and proposed regulatory measures addressing those factors Aeronautical and air transport engineers interested in aerial vehicle systems design as well as public administrators and regulators concerned with energy efficiency or environmental issues in air transport will benefit greatly from this comprehensive reference which captures necessary background information along with the newest developments in the field Examines new developments in energy efficiency in the air transport field Includes exergy analyses of aerial vehicles and systems Shows the environmental impact from fuel use including local air quality consumption of non renewable materials and contribution to climate change Discusses the CO2 emissions certification required by ICAO for new aircraft models

Advances in Civil Aviation Systems Development Ivan Ostroumov, Karen Marais, Maksym Zaliskyi, 2025-07-02 This book includes high quality research papers presented at 3rd International Workshop on Advances in Civil Aviation Systems Development ACASD 2025 which was joint event of School of Aeronautics and Astronautics of Purdue University IN USA and National Aviation University Kyiv Ukraine This book presents original results of a scholarly study of unique research teams and market leaders on the development in civil aviation systems and its application The book topics include major research areas focused on advances in air transportation interference in global navigation satellite system aircraft noise communication systems for civil aviation systems surveillance data processing methods of operational efficiency improvement sensors in civil aviation human factor and unmanned aircraft systems Book is useful for scholars and professionals in the civil aviation domain

Integrated Computer Technologies in Mechanical Engineering - 2022 Mykola Nechyporuk, Vladimir Pavlikov, Dmitriy Kritskiy, 2023-07-19 The International Scientific and Technical Conference Integrated Computer Technologies in Mechanical Engineering Synergetic Engineering ICTM was established by National Aerospace University Kharkiv Aviation Institute The Conference ICTM 2022 was held in Kharkiv Ukraine during November 18 20 2022 During this conference technical exchanges between the research community were carried out in the forms of keynote speeches panel discussions as well as special session In addition participants were treated to a series of receptions which forge collaborations among fellow researchers ICTM 2022 received 137 papers submissions from different countries All of these offer us plenty of valuable information and would be of great benefit to experience exchange among scientists in modeling and simulation The organizers of ICTM 2022 made great efforts to ensure

the success of this conference We hereby would like to thank all the members of ICTM 2022 Advisory Committee for their guidance and advice the members of program committee and organizing committee and the referees for their effort in reviewing and soliciting the papers and all authors for their contribution to the formation of a common intellectual environment for solving relevant scientific problems Also we grateful to Springer Janusz Kacprzyk and Thomas Ditzinger as the editor responsible for the series Lecture Notes in Networks and Systems for their great support in publishing these selected papers

Digital Avionics Handbook Cary Spitzer,Uma Ferrell,Thomas Ferrell,2017-11-22 A perennial bestseller the Digital Avionics Handbook offers a comprehensive view of avionics Complete with case studies of avionics architectures as well as examples of modern systems flying on current military and civil aircraft this Third Edition includes Ten brand new chapters covering new topics and emerging trends Significant restructuring to deliver a more coherent and cohesive story Updates to all existing chapters to reflect the latest software and technologies Featuring discussions of new data bus and display concepts involving retina scanning speech interaction and synthetic vision the Digital Avionics Handbook Third Edition provides practicing and aspiring electrical aerospace avionics and control systems engineers with a pragmatic look at the present state of the art of avionics

Proceedings of the 2nd International Workshop on Advances in Civil Aviation Systems Development Ivan Ostroumov,Maksym Zaliskyi,2024-05-14 This book includes high quality research papers presented at 2nd International Workshop on Advances in Civil Aviation Systems Development ACASD 2024 which was at National Aviation University Kyiv Ukraine on March 26 2024 This book presents original results of a scholarly study of unique research teams and market leaders on the development in civil aviation systems and its application The book topics include major research areas focused on advances in air traffic management data processing in civil aviation automatic control in civil aviation systems modern trends in navigation systems development methods of operational efficiency improvement human factor and application of artificial intelligence in civil aviation systems This book is useful for scholars and professionals in the civil aviation domain

Fundamentals of International Aviation Suzanne K. Kearns,2021-03-21 International aviation is a massive and complex industry that is crucial to our global economy and way of life Designed for the next generation of aviation professionals Fundamentals of International Aviation second edition flips the traditional approach to aviation education Instead of focusing on one career in one country it introduces readers to the air transport sector on a global scale with a broad view of all the interconnected professional groups This text provides a foundation of how aviation works in preparation for any career in the field including regulators maintenance engineers pilots flight attendants airline and airport managers dispatchers and air traffic controllers among many others Each chapter introduces a different cross section of the industry from air law to operations security to environmental impacts A variety of learning tools are built into each chapter including 24 case studies that describe an aviation accident related to each topic This second edition adds new learning features geographic representation from Africa a new chapter on economics full color illustrations and updated and

enhanced online resources This accessible and engaging textbook provides a foundation of industry awareness that will support a range of aviation careers It also offers current air transport professionals an enriched understanding of the practices and challenges that make up the rich fabric of international aviation

Introduction to Space Law Tanja Masson-Zwaan, Mahulena Hofmann, 2019-01-16 The relevance and substance of space law as a branch of public international law continues to expand The fourth edition of this long time classic in the field of space law has been substantially rewritten to reflect new developments in space law and technology of the past ten years This updated text includes new or expanded material on the proliferation of non state and commercial entities as space actors the appearance of innovations in space technology the evolving international law of satellite telecommunications in a networked world and the adoption of national laws and international soft law mechanisms that complement the international treaty regime In this up to date overview of space law the authors offer a clear analysis of the legal challenges that play a role in new and traditional areas of space activity including the following the peaceful uses of outer space protection of the space environment the emergence of new legal mechanisms in space law the role of Europe in space telecommunications the commercial use of space resources human space flight small satellites remote sensing and global navigation satellite systems Additionally the five United Nations Treaties on space are included as Annexes for easy reference by students and professionals alike In light of the many new developments in the field this thoroughly updated Introduction to Space Law provides a clear overview of the legal aspects of a wide array of current and emerging space activities Lawyers policy makers diplomats students and professionals in the telecommunication and aerospace sectors with or without a legal background will find concise yet comprehensive guidance in this book that will help them understand and address legal issues in the ever changing field of space activities The authors are close former collaborators of the late pioneers of space law and authors of the earlier editions of this volume Isabella Diederiks Verschoor and Vladimir Kopal

Radio Navigation Systems for Airports and Airways Oleg Nicolaevich Skrypnik, 2019-03-29 This book highlights the design principles of ground based radio navigation systems used in solving navigation tasks in the airfield and on air routes Mathematical correlations are illustrated that describe its operation peculiarities of disposition main technical characteristics generalized structural diagrams as well as the inter operation with onboard equipment Examples of building construction functional diagrams and characteristics of Russian made radio navigation systems are discussed This book is written for students of electronics and aviation disciplines It can also be useful for aviation specialists as well as for those interested in air radio navigation

Cognitive Infocommunications, Theory and Applications Ryszard Klempous, Jan Nikodem, Péter Zoltán Baranyi, 2018-08-25 The book gathers the chapters of Cognitive InfoCommunication research relevant to a variety of application areas including data visualization emotion expression brain computer interfaces or speech technologies It provides an overview of the kind of cognitive capabilities that are being analyzed and developed Based on this common ground it may become possible to see new opportunities for

synergy among disciplines that were heretofore viewed as being separate Cognitive InfoCommunication begins by modeling human cognitive states and aptitudes in order to better understand what the user of a system is capable of comprehending and doing The patterns of exploration and the specific tools that are described can certainly be of interest and of great relevance for all researchers who focus on modeling human states and aptitudes This innovative research area provides answers to the latest challenges in influence of cognitive states and aptitudes in order to facilitate learning or generally improve performance in certain cognitive tasks such as decision making Some capabilities are purely human while others are purely artificial but in general this distinction is rarely clear cut Therefore when discussing new human cognitive capabilities the technological background which makes them possible cannot be neglected and indeed often plays a central role This book highlights the synergy between various fields that are perfectly fit under the umbrella of CogInfoCom and contribute to understanding and developing new human artificial intelligence hybrid capabilities These merged capabilities are currently appearing and the importance of the role they play in everyday life are unique to the cognitive entity generation that is currently growing up
