Performance Evaluation And Benchmarking Of Intelligent Systems:

Performance Evaluation and Benchmarking of Intelligent Systems Raj Madhavan,Edward Tunstel,Elena Messina,2009-09-18 To design and develop capable dependable and affordable intelligent systems their performance must be measurable Scientific methodologies for standardization and benchmarking are crucial for quantitatively evaluating the performance of emerging robotic and intelligent systems technologies There is currently no accepted standard for quantitatively measuring the performance of these systems against user defined requirements and furthermore there is no consensus on what objective evaluation procedures need to be followed to understand the performance of these systems The lack of reproducible and repeatable test methods has precluded researchers working towards a common goal from exchanging and communicating results inter comparing system performance and leveraging previous work that could otherwise avoid duplication and expedite technology transfer Currently this lack of cohesion in the community hinders progress in many domains such as manufacturing service healthcare and security By providing the research community with access to standardized tools reference data sets and open source libraries of solutions researchers and consumers will be able to evaluate the cost and benefits associated with intelligent systems and associated technologies In this vein the edited book volume addresses performance evaluation and metrics for intelligent systems in general while emphasizing the need and solutions for standardized methods To the knowledge of the editors there is not a single book on the market that is solely dedicated to the subject of performance evaluation and benchmarking of intelligent systems *Application of Intelligent Systems in Multi-modal Information Analytics* Vijayan Sugumaran,Zheng Xu,Huiyu Zhou,2020-07-20 This book presents the proceedings of the 2020 International Conference on Intelligent Systems Applications in Multi modal Information Analytics held in Changzhou China on June 18 19 2020 It provides comprehensive coverage of the latest advances and trends in information technology science and engineering It addresses a number of broad themes including data mining multi modal informatics agent based and multi agent systems for health and education informatics which inspire the development of intelligent information technologies The contributions cover a wide range of topics such as AI applications and innovations in health and education informatics data and knowledge management multi modal application management and web social media mining for multi modal informatics Outlining promising future research directions the book is a valuable resource for students researchers and professionals and a useful reference guide for newcomers to the field **Intelligent Systems for Sustainable Person-Centered Healthcare** Dalia Kriksciuniene,Virgilijus Sakalauskas,2022-02-17 This open access book establishes a dialog among the medical and intelligent system domains for igniting transition toward a sustainable and cost effective healthcare The Person Centered Care PCC positions a person in the center of a healthcare system instead of defining a patient as a set of diagnoses and treatment episodes The PCC based conceptual background triggers enhanced application of Artificial Intelligence as it dissolves the limits of processing traditional medical data records clinical tests and

surveys Enhanced knowledge for diagnosing treatment and rehabilitation is captured and utilized by inclusion of data sources characterizing personal lifestyle and health literacy and it involves insights derived from smart ambience and wearables data community networks and the caregivers feedback The book discusses intelligent systems and their applications for healthcare data analysis decision making and process design tasks The measurement systems and efficiency evaluation models analyze ability of intelligent healthcare system to monitor person health and improving quality of life
