

# Text Leveling Correlation Guide

## Grades K-6

Because every reader is different, teachers often rely on a system of leveled books to match their students with just-right books. There are many systems and methods for leveling books and leveling books can vary often among the various reading systems. This chart is designed to assist teachers in correlating the reading levels across two of the most commonly used leveling systems. The chart approximates how these levels correlate in each other and to school levels. This leveling correlation is presented for general purposes only. Teachers are encouraged to adjust this correlation according to their personal evaluation and professional judgment.
