From the Ground Up Patrick Daly, R Michael Feener, Anthony J S Reid, 2012 The tsunami that struck a dozen

countries around the Indian Ocean on 26 December 2004 evoked international sympathy on a scale beyond any previous natural disaster. The international relief effort broke all records both in scale and diversity with seven billion U.S. dollars donated from all over the world through public and private agencies for Sumatra alone. Simply as a reconstruction effort, therefore, the disbursement of those funds and the rebuilding of housing infrastructure and economy posed major national and international challenges. However, this was not simply a reconstruction effort. Aceh at that time was a war zone with Indonesia's military engaged in a major operation to crush a separatist rebellion that had been simmering since 1976. Even though the funds had been donated for tsunami relief, any real reconstruction of Aceh had to consider the impact of the conflict on the well-being of the population as well as governance and administrative capacities. This volume serves the purpose not only of discussing some of the lessons of the Aceh reconstruction and peace processes but also of maintaining critical links between Aceh and the international community after the initial tranches of aid expire.

Handbook of College Reading and Study Strategy Research, **Resources in Education**, 1997-04 Global Futures Ronaldo Munck, 2025-02-27

Global Futures: Key Concepts for Social Transformation provokes us to rethink some of the key words and concepts which define the current global order. Prompted by crises around the world, it seeks to re-energise our desire for a better future. The book takes seven key concepts from the new global studies and considers how they are used and whether they are adequate for addressing the twenty-first century's increasingly complex global order. The topics covered include widely used concepts such as development, modernity, history, and politics, as well as more unusual themes such as desire, complexity, and alternative futures. The core message of this book is that we need to grasp the complex and contradictory reality behind these important concepts in order to foster a new way of thinking, seeing, and acting for a future fit for human purpose. Written by Ronaldo Munck, a key social theorist and social activist with a Latin American and European background, this book will be perfect for students and researchers of sociology, politics, international relations, and global development.
