Constructivism and the Metaphysics of Qualitative Research John Paley, 2024-09-30 This book challenges the widespread assumption that a necessary preliminary to qualitative research is the formulation of ontological and epistemological beliefs It argues that the metaphysical claims which supposedly underpin different approaches to social research do not make sense Literally Sentences such as There is a single objective reality and There are multiple constructed realities fail to make information providing statements They do not refer or describe Despite appearances they say nothing about reality or realities at a fundamental level so they cannot be used to justify ground or align with methodological decisions The necessary preliminary turns out not to be necessary at all and we can dispense with not just paradigms but metaphysical underpinnings in general whether structured as paradigms or not Drawing on Wittgenstein s later philosophy Carnap s metametaphysics and contemporary linguistics the book suggests that the metaphysical claims of qualitative texts can be reinterpreted as performative Ontological and epistemological beliefs are resolutions and proposals recommendations for the use of language They form part of a creed by means of which researchers enact the joining of an academic community Written in Paley s trademark clear accessible and conversational style the book points to a revolution in our understanding of the relation between metaphysics and social research It will be essential reading for anyone interested in qualitative research and its
