5th Grade Research

Objective:

For this research report you will choose a country. You will find accurate information using appropriate internet websites and nonfiction texts. Your final report will include an informational paper and your choice of the following: PowerPoint presentation, tri-fold poster, or brochure.

Research and Requirements:

- Sources - You must use at least **one** nonfictional text and the internet. Nonfiction texts can be checked out from Coebourn's Library, but if our library does not have books on your country, you will need to go the local library. Also, included is a list of approved, kid-friendly websites.
- Required Research - Students are required to research the country's history, geography, and government. Students may choose an additional **TWO** topics to research. Examples may include the country's flag, attractions, food, or capital city. A list of topics and subtopics has been provided.
- Note cards - Students will record their researched information on notecards (teacher will provide). Notecards will act as our graphic organizer. Remember to include the sources (book, website) where you found your information on the back of the note card.
- Rough Draft - once you have completed the research on your note cards, you will create a rough draft. Please skip lines. Drafts must be checked by the teacher before moving onto your typed, publish copy.
- Research Paper - Students will type their research paper. Once the paper is complete, students may begin working on either their tri-fold poster brochure, or PowerPoint presentation.
➢ Please refer to your rubric to make sure you have included everything
- Bibliography - Students will write a bibliography in class, documenting the sources that they used for their project.

Handbook of Research Strategies for Clinical Psychology Jonathan S. Comer,Philip C. Kendall,2013-03-26 Mental
health problems impose a staggering worldwide public health burden Regrettably whereas many sciences have been
progressing for centuries e g biology chemistry it is only recently that the strategies of science have been applied to the field
of clinical psychology At this relatively early stage in the science of clinical psychology the majority of work is ahead of us
and as such the prepared investigator must be familiar with the full portfolio of modern research strategies a set of directions
for getting from here to there To continue to move the science of clinical psychology forward investigators benefit when they
systematically rely on research strategy routes that achieve favorable balances between scientific rigor and clinical relevance

With this need in mind The Oxford Handbook of Research Strategies for Clinical Psychology has recruited some of the field's foremost experts to explicate the essential research strategies currently used across the modern clinical psychology landscape that maximize both precision and significance. Chapters in this volume address design, measurement, and analytic strategies for clinical psychology, including comprehensive coverage of effective laboratory methods in experimental psychopathology, single case experimental designs, small pilot trials, the randomized controlled trial, adaptive and modular treatment designs, and dissemination methods and models. Change measurement, observational coding, measurement of process variables across treatment, structural and functional brain imaging, and experience sampling data collection methods, statistical power, correlation and regression, randomized clinical trial data analysis, conventions in mediation and moderation analysis, structural equation modeling, meta-analytic techniques, item response theory, and the appropriate handling of missing data. The book concludes with an integrative summary of research strategies addressed across the volume and guidelines for future directions in research methodology design and analysis that will keep our young science moving forward in a manner that maximizes scientific rigor and clinical relevance.
