

This report is separated into paragraphs,
which each give information about a
particular aspect of the animal.
The topic of each paragraph is made
clear by the sub-headings.

Thinking about the
information you have
about your animal, what
sub-headings could you
use in your report?

BACK

Think, pair, then share your ideas.

What is a sloth?

A sloth is a mammal found in the northwestern of Central and South America. There are two types of sloth - two-toed sloths and three-toed sloths.

Appearance

Sloths have long, hairy, round heads and long ears. They have long, sharp claws for climbing trees and hanging from branches. Their fur often has a green, leaf-covered to the color that grows on it. The shape can help camouflage the sloth, and help to keep predators such as eagles, snakes and jaguars.

A three-toed sloth.

A two-toed sloth.

Habitat

Sloths are arboreal animals - this means that they spend most of their time in trees. They eat, sleep and even give birth hanging upside down from branches. Sloths only come down from the trees to go to the toilet.

Diet

Sloths mostly eat leaves, fruits, buds and shoots, but they have been known to occasionally eat insects and birds. They have an extremely slow digestion process which takes up most of their body's energy - one will eat later a sloth at first to fully digest!

Movement

Sloths move extremely slowly. They crawl through the trees at an average speed of just a centimetre an hour, and can move closer to the ground. They are fearless, and occasionally will even climb up to drink water from the leaves.

Did you know...?

- Some have called it 'one of the laziest animals in the world'.
- Sloths can live for up to 40 years in the wild.
- They also give birth upside down.
