However, it is worthwhile to pay attention to thinking styles in addition to traditional constructs in individual differences such as personality. Are there good styles or bad styles? Can thinking style be cultivated? Which thinking styles should we aim to cultivate? And how to cultivate these styles? This book answers these questions and more by addressing three major controversial issues in the field of styles: namely, whether thinking styles are distinct from or are part of personality traits; whether or not thinking styles can be changed; and whether or not thinking styles are value laden. Based on a comprehensive review of previous literature and the analyses of results from a mixed method longitudinal study, the book provides solid and intriguing research evidence to the discussion of the above issues.
