Some people speak Chinese, others Spanish; I speak HTML. Language is intricately beautiful, with sentences flowing all within grammar constraints creating masterpiece bound by rules. If poetry in English can be considered art, so too can programming. Just as every sentence in English has a meaning and purpose, every line of code invokes a function.

Instead of communicating with people, coding is essentially having a conversation with computers, directing them onto what is desired. Unlike people, however, computers don't have imagination, and therefore require users to be precise in every word and sentence they depict. Just as an artist expresses imagination with a pen, a programmer uses a keyboard.

Aside from being just a program, websites bring people closer together. Because Singapore is incredibly small, in order for my school to challenge its athletes, we have to go overseas to play against other schools. Forming a league called IASAS, schools visit each other and compete. The only issue with this is how expensive it is to travel, resulting in the teams flying without family or friends. Competitors often feel alone and unwelcome in the foreign school.

A website was the perfect solution for this: after much planning and deliberation, I formed a team to make a site where parents and friends could encourage their athletes! We started with brainstorming how to avoid cluttering the website and how best to keep it simple whilst connecting people together. Using flowcharts and diagrams, I used design principles to make it visually pleasing whilst maintaining structure and foundation. Focusing on supporting the athletes, guests were able to leave comments, get live scoring, and videos of the games.

The site allows parents and friends to encourage their students during some of the most significant tournaments of their high school careers. Creativity serves many functions, and mine intends to bring people closer together.

Hart, 2005 The Declaration of Independence states that all men are

created equal in the United States but that statement does not hold true for words. Some words carry more weight than others; they seem to work harder, get more done, and demand more respect. *Political Keywords Using Language That Uses Us* looks at eight dominant words that are crucial to American political discourse and how they have been employed during the last fifty years. Based on an analysis of eleven separate studies of political language, *Political Keywords* helps readers to understand what these terms mean and how they are used. For example, the book tracks what politics now means to modern commentators, how school teachers impress certain values upon the nation's children by invoking the office of the president, and why an innocent word like government sometimes makes people so upset. It details how the people are referenced in political talk and how the media portray themselves. The book also considers the work done by political parties, political promises, and political consultants because together they shed special light on modern elections. Combining social science with subtle forms of cultural interpretation, *Political Keywords Using Language That Uses Us* provides a fresh look at both American politics and American language. It is an ideal text for undergraduate and graduate courses in political communication, political language, political campaigns, media, and politics, political psychology, public opinion, rhetorical criticism, contemporary public address, and presidential rhetoric.
