Blended learning environments to foster self-directed learning Christo van der Westhuizen,Mncedisi C. Maphalala,Roxanne Bailey,2023-03-31 This book on blended learning environments to foster self directed learning highlights the focus on research conducted in several teaching and learning contexts where blended learning had been implemented and focused on the fostering of self directed learning Several authors have contributed to the book and each chapter provides a unique perspective on blended learning and self directed learning research From each chapter it becomes evident that coherence on the topics mentioned is established One of the main aspects drawn in this book and addressed by several authors in the book is the use of the Community of Inquiry CoI framework when implementing teaching and learning strategies in blended learning environments to foster self directed learning This notion of focusing on the CoI framework is particularly evident in both theoretical and empirical dissemination presented in this book What makes this book unique is the fact that researchers and peers in varied fields would benefit from the findings presented by each chapter albeit theoretical methodological or empirical in nature this in turn provides opportunities for future research endeavours to further the narrative of how blended learning environments can be used to foster self directed learning

A path to wellness in the educational and health systems Lynn Preston,Wanda van der Merwe,2023-11-30 The Six Bricks initiative is a teaching and learning method that encourages focused engagement in the classroom by all learners from the foundation phase to adulthood By using six simple colourful DUPLO bricks an element of play is introduced into a situation that inevitably leads to all individuals focusing and interacting This is one of the major contributions to all teaching and learning disciplines and promotes the audience to learn with enjoyment enthusiasm and concentration Along with this communication is promoted sparking unimaginable creativity and creation This book provides the reader with an alternative focus to the original educational application of the Six Bricks activities This Six Bricks initiative focuses on the therapeutic application and processes in communities schools and within individuals themselves As each author has had an intimate connection with Six Bricks initiative they are all more than qualified to provide their autoethnographic reflections on this initiative which holds so much promise and excitement for learning and teaching Therefore each author s contributions were original and personalised providing a new field in the avenues of research in the South African context as South Africa does not have as yet much research on this topic The methodology used in this qualitative research study was primarily from each author s perspective thus their self reflection and anecdotal personal

experiences form the core of these chapters Therefore this autoethnographic is a self reflective form of writing which involves self observation and reflective investigation in the context of ethnographic fieldwork and writing Scaffolding work-integrated learning excursions Adri Du Toit, Neal Petersen, Iman C. remains a divisive and polarizing topic within scholarly and ecclesiastical communities in South Africa. These tensions are not limited to theoretical differences but often crystallize on a grassroots level when local churches and church assemblies have to make important decisions on controversial ethical topics such as ordaining women in church offices, assessing the ethics of gay marriages and taking a stance on the land debate in South Africa. This book makes a unique contribution in two ways: firstly, it focuses on the uniquely South African hermeneutical landscape; secondly, it relates theories to practical ethical application. The unique scholarly contribution of this consists in it relating hermeneutics to ethics within the South African landscape. A diverse group of scholars have been invited to partake in the project and the views expressed are often quite diverse. This allows readers to develop an understanding and sensitivity of the various angles employed and the interests at stake in addressing difficult societal problems.

Self-Directed Learning (Prof.) Elsa Mentz, Charlene du Toit-Brits, Jean Henry Blignaut, Elize Vos, 2024-12-20. The book presents original research from multiple authors which provides diverse perspectives and methodologies for enhancing understanding of SDL. It primarily focuses on incorporating SDL into curriculum development and emphasises the significance of scholarly research in designing effective curricula. The book explores the integration of technology in learning and adapts instructional strategies to meet the evolving demands of higher education and school environments. Inspired by constructivism, socio-constructivism and context-based learning theories, the text presents practical strategies for educators. Key topics include the implications of artificial intelligence strategies for reducing procrastination, fostering SDL in homeschooling, enhancing SDL attributes, preparing teachers for self-direction, facilitating curriculum transformation and incorporating indigenous knowledge. The book also covers teaching climate change education and integrating educational robotics. Self-Directed Learning Curriculum implementation praxis and scholarship in context is invaluable for scholars and researchers in education, providing empirical findings and practical insights to inspire further research. Leadership Approaches to Negotiate Challenges in a Changing Education Landscape Leentjie van Jaarsveld, Kobus Mentz, Charl C. Wolhuter, 2020-12-31. The argumentative point of departure of this scholarly book is the common conviction of specialists in the field of education in South Africa that the national education system is not at a satisfactory level in both the academic and the public discourse. Such allegations are made and frequently stronger adjectives than non-satisfactory are used. Results of international test series in which South Africa has participated, such as the 2015 TIMSS tests, confirm the negative verdicts found in the public and scholarly discourse. This book aims to argue that although the lack of performance could be attributed to a multiplicity of factors, one factor that can make a difference in the achievement levels obtained by learners in schools is leadership. The book demonstrates that a particular problem of both the scholarly and the public discourse on education in South Africa is an overtone of defeatism or resignation.

blaming all ills in the education system and educational institutions on historical legacies and or contextual factors such as socio economic deprivation in the catchment areas of schools or poor resources and infrastructure This collected work was inspired by a recently published spate of articles on top performing schools including top performing schools in rural communities in which it was demonstrated that good leadership can overcome such contextual and other challenges The book unpacks the issue of leadership in South African schools from a variety of perspectives thus contributing to the development of the scholarly discourse on Educational Leadership in South Africa The target audience of the book is scholars of Educational Leadership The research reported in the chapters draw on a wide range of methodologies including empirical survey research questionnaires and interviews critical literature surveys and the comparative method

Biblical Theology of Life in the Old Testament Albert J. Coetsee, Francois P. Viljoen, 2021-11-30 Life is a primary theme in Scripture expressed in the rich diversity of the various books corpora and genres of Scripture Much has been published on what Scripture teaches about life and death To date however no comprehensive biblical theology in which the concept of life is traced throughout the different books and corpora of the Old and New Testament has been published It is this lacuna that this book aims to fill assuming that such an approach can provide a valuable contribution to the theological discourse on life and related concepts The primary aim of this book is to give an indication of the different nuances of the concept of life in the various books and corpora of the Old and New Testament by providing the reader with a book by book overview of the concept of life in Scripture The secondary aim is to give an indication of the overall use and function of the concept of life in the Old Testament the New Testament and Scripture as a whole The latter is provided by using the findings of the book by book overview of the concept of life in Scripture to draw the lines together

Becoming a teacher Josef de Beer, 2020-12-31 This book disseminates original research on learning in and from practice in pre service teacher education Authors such as Lederman and Lederman describe the student teaching practicum or work integrated learning WIL which is an essential component of pre service teacher education as the elephant in the room These authors note that the capstone experience in any teacher education programme is the student teaching practicum after all this is where the rubber hits the road However many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher This is the gap that this research book addresses Most of the chapters in the book report empirical data with the exception of two chapters that can be categorized as systematic reviews WIL is addressed from various angles in the chapters Chapter 6 focuses on research related to what makes Finnish teacher education so effective and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school based on Finnish insights in Johannesburg Chapter 3 highlights the challenges faced in open and distance learning teacher education contexts Several of the chapters disseminate research findings on alternative interventions to classic WIL namely where safe spaces or laboratories are created for student teachers to learn and grow

professionally These could either be simulations such as software programmes and avatars in the intervention described in Chapter 2 student excursions as the findings in chapters 5 7 and 10 portray or alternative approaches to WIL e g Chapters 11 and 12 The book is devoted to scholarship in the field of pre service teacher education The target audience is scholars working in the fields of pre service teacher education work integrated learning and self directed learning The book makes a unique contribution in terms of firstly its extensive use of Cultural Historical Activity Theory as a research lens and secondly in drawing on various theoretical frameworks Both quantitative and qualitative research informed the findings of the book

The human dilemma of displacement Alfred R. Brunsdon, 2020-12-31 In this book social responsive theological research converges to provide practical theological and ecclesiological perspectives on the growing human dilemma of displacement The book presents the research of practical theologians a missiologist and a religious practitioner whose work pertains first and foremost to the South African context The different fields of expertise of the contributors within the broader field of practical theology worked towards a unique compilation of themes each relevant to the issue at stake The majority of chapters are theoretically orientated except where authors refer to empirical work conducted during previous research The main contribution of this collaborative work is to be sought in the practical theological and ecclesiological perspectives it provides It engages the critical questions of what kind of church we need and what kind of care we should provide in the face of the growing predicament of human displacement The theological and theoretical principles uncovered in the different chapters will be of use to theologians from all theological subdisciplines as well as to religious practitioners and leaders of faith communities that are challenged with the growing realities of strangers on their doorsteps and in their pews

Reconceptualising education support services in South Africa Johnnie Hay, Macalane J. Malindi, Thabo Makhalemele, 2022-02-10 Inclusive education has been phased into South Africa since 2001 but relies heavily upon adequate support services to support learners and teachers experiencing barriers to learning and development This book focuses on the different levels of support provided in South African education from School based Support Teams to District based Support Teams through to special and full service schools and how these could be reconceptualised to provide improved support to learners and teachers Current research indicates that inclusive education is being implemented in varied and fragmented forms across the country and the point of departure of this work is that education support services need to be improved and reconceptualised to ensure better support for inclusive education

Understanding Relational and Group Experiences through the Mmogo-Method® Vera Roos, 2016-07-13 This volume describes the development and application of the Mmogo method as a projective visual data gathering method applied in different contexts and with different groups of people Mmogo means

togetherness in Setswana one of the 11 official languages of South Africa The Mmogo method provides a deep understanding of personal relational and group experiences and is particularly useful in cross cultural contexts and across age groups By allowing visual expressions of the self as a complex dynamic social system it overcomes some of the limitations of traditional data collection methods such as questionnaires or interviews The book draws together contributions by leading social scientists to show how this flexible visual data collection method can be used independently or jointly with other data gathering techniques such as journalling or in depth interviewing to acquire rich information The research method described here enables investigators to access perceptions feelings and personal experiences participants might otherwise find hard to verbalize and explain Researchers in disciplines such as education social sciences consumer sciences market research and city and town planning will find this book and its innovative method particularly valuable in addressing a gap in available visual and other data collection resources
