A Prospectus for the Total Development of Northwest Georgia Coosa Valley Area Planning and Development Commission, 1960 *Handbook on Green Infrastructure* Danielle Sinnett, Nick Smith, Sarah Burgess, 2015-11-27 Green infrastructure encompasses many features in the built environment. It is widely recognised as a valuable resource in our towns and cities and it is therefore crucial to understand, create, protect and manage this resource. This Handbook sets the context for green infrastructure as a means to make urban environments more resilient, sustainable, liveable and equitable. Including state of the art reviews that summarise the existing knowledge as well as research findings, this Handbook provides current evidence for the beneficial impact of green infrastructure on health, environmental quality and the economy. It discusses the planning and design of green infrastructure as a strategic network down to the individual features in a neighbourhood and looks at the process of green infrastructure implementation, emphasising the importance of collaboration across multiple professions and sectors. This comprehensive volume operates at multiple spatial scales from strategic networks at the regional level to individual features in neighbourhoods, with international case studies used throughout to illustrate key examples of good practice. This collection of expert contributions will be invaluable to students and academics in the fields of planning, urban studies and geography. Practitioners and policy makers will also find the policy discussion and examples enlightening. **From World Factory to Global Investor** Xuedong Ding, Chen Meng, 2017-11-22 Chinese outward direct investment (ODI) is growing rapidly in recent years. As an important phenomenon in the global economy, China's ODI deserves more thorough analysis. This book looks at China's ODI activities from multiple perspectives. With the rebalancing of China's own structural growth and China's shift towards a net capital exporter, her initiatives such as One Belt One Road (OBOR) have brought profound implications to the traditional super sovereign or multilateral financial and investment cooperation mechanism. As her investment destinations and investment methods become more diversified and sophisticated, this book offers unique and refreshing insight into China's ODI activities. The book covers the whole range of history and policy development of China's ODI and analyses China's ODI trends and characteristics in the recent years. It reviews China's major policy changes after the Third Plenary Session of the 18th Central Committee of the Communist Party and how they may impact China's ODI strategy and activities. The book addresses potential challenges and risks of rising ODI activities from practitioners' perspective and discusses how recipient countries may react and respond to the surge of Chinese capital. The book also offers policy implications and future research agenda in relation to the Chinese investments.
