BANTAM User Guide Julian Ashbourn, 2013-03-09 BANTAM is the first modeling language specifically designed for applications in Biometrics and Token Technology. It represents a significant step forward for the design and implementation of biometric and related technology applications in that it is very simple to learn and use; it offers a consistent system of documentation and a clarity of presentation which make the accurate description of user requirements much easier; it provides a complete methodology for managing the project from original business case through procurement and implementation to subsequent training and support. The User Guide provides much more than just a guide to the Bantam methodology; readers will also find lots of good advice on program management in general and will gain an insight into designing biometric and related applications.
