

# Everything From Nothing

## Paragraph 1

We as human are always mesmerized, from where we have come , who have created this universe , why everything we see exist & what is the future & why we cannot see the future ? Why earth revolve around the sun & why moon revolve around the earth & why sun is so hot & why solar system exist? Why there are countless plants & why animals exist on earth? Why day & night happen?

## Paragraph 2

Why Light comes from sun & why we can see it in light form only? Why a human takes birth & why humans, animals & plants die? What is time & how it exists? Why there are different type of foods, liquids, elements exist. We can continue this list & we can keep on adding questions, which each one of us are trying to know from past hundreds- thousands of years. Many explanations by scientists & philosophers has been given from past thousands of years to all our above questions & yet , till today , no explanation has satisfies us.

## Paragraph 3

Today we will try to explain it to you. Let us begin with famous scientist & remember what he said in his famous equation ,  $E=MC^2$  . He said only 'Mass converts in to energy & then energy converts in to mass!'. Means he simply said , nothing is ever destroyed & nothing is ever created. What a beautiful & absolutely correct line , 'Nothing is ever destroyed & nothing is ever created'. This line solve half the problem, means the problem of 'the things mention in paragraph 1 & paragraph 2'. Means we need to just simply forget that, 'Life or death of something', because as per Einstein , it is just conversion of one form to another & 'nothing is really taking Birth or dying as such' or 'Nothing is ever created or destroyed"

## Paragraph

If we agree, nothing is really taking birth or dying ', then next puzzle is 'Why all those things exist around us including ' -'what we see, smell , touch , hear , taste' in everyday life , from an apple to moon itself ? Ok let us explain it with very basic example. Why moon exist , because by eyes we can see that. Also scientist claim , they have been to moon & they touched it by leg & hands. So we are sure moon exist, because , we can see that in sky & someone has touched also. Ok now our example come in picture , suppose a man live in 1 room & in room there is light bulb , there are oranges in a plate. There is nice sofa to lie down. There is TV playing good music. A man is relaxing in room , enjoying TV , listening music , eating orange & smelling good fragrance . Suppose in hypothetical situation this our
