**Forestry and Water Conservation in South Africa** Brett Bennett,Fred Kruger,2015-11-11 This innovative interdisciplinary study focuses on the history science and policy of tree planting and water conservation in South Africa South Africa s forestry sector has sat often controversially at the crossroads of policy and scientific debates regarding water conservation economic development and biodiversity protection Bennett and Kruger show how debates about the hydrological impact of exotic tree planting in South Africa shaped the development of modern scientific ideas and state policies relating to timber plantations water conservation invasive species control and biodiversity management within South Africa as well as elsewhere in the world Forestry and Water Conservation in South Africa shows how scientific research on the impact of exotic and native vegetation led to the development of a comprehensive national policy for conserving water producing timber and protecting indigenous species from invasive alien plants Policies and laws relating to forests and water began to change in the late 1980s and early 1990s as a result of political and administrative changes within South Africa This book suggests that the country s contemporary policies towards timber plantations guided by the National Water Act of 1998 need to be reconsidered in light of the authors findings Bennett and Kruger also call for more interdisciplinary research and greater emphasis on integrated policies and management plans for forestry invasive alien plants water conservation and biodiversity preservation

**Models and Estimation of Genetic Effects** José M Álvarez-Castro,Rong-Cai Yang,2015-04-17 Ronald Fisher needed to develop elaborate models of genetic effects in order to set the foundations of Quantitative Genetics in his 1918 paper The correlation between relatives on the supposition of Mendelian inheritance Since then many significant implementations have been made to model genetic effects However at the verge of one century after Fisher s kick off models of genetic effects keep on being discussed and implemented Indeed the relatively recent advent of QTL analyses challenged the state of the art of this field by providing researchers the opportunity to obtain and analyze estimates of genetic effects from real data In this context the development of this field was not exempt of some polemics like the debate about the

convenience of the functional and the statistical epistasis approaches This research topic is meant to provide recent developments in models and estimation of genetic effects and to enrich the discussion about how and why models of genetic effects must be further developed and applied The articles in this Research Topic shall thus extend refine and or provide a refresh look at Fisher s original models of genetic effects and their application to genetic effects estimation and to improve our understanding of evolutionary processes and breeding programs      *The economics of teff: Exploring Ethiopia's biggest cash crop* Minten, Bart,Taffesse, Alemayehu Seyoum,Brown, Petra,2018-07-19 Considerable poverty and food insecurity in Ethiopia combined with the overwhelming majority of Ethiopians who depend on agriculture for their livelihoods make agricultural transformation a crucial development goal for the country One promising improvement is to increase production of teff the calorie and nutrient rich but low yielding staple The Economics of Teff Exploring Ethiopia s Biggest Cash Crop examines key aspects of teff production marketing and consumption with a focus on opportunities for and challenges to further growth The authors identify ways to realize teff s potential including improving productivity and resilience selecting and scaling up new technologies establishing distribution systems adapted to different areas needs managing labor demand and postharvest operations and increasing access to larger and more diverse markets The book s analysis and policy conclusions should be useful to policy makers researchers and others concerned with Ethiopia s economic development

**Understand Salinity Variations in a Highly Dynamic Tidal River** Ali Dinar Abdullah, 2017-03-16 This book reports the first systematic monitoring and modelling study on water availability water quality and seawater intrusion of the Shatt al Arab River SAR on the border of Iraq and Iran where causes and concentration levels of salinity have not yet been fully understood let alone addressed leading to conflicting perceptions of its origin external or internal the natural conditions and the practices that can explain the current critical conditions Current scientific knowledge on the SAR salinity problem is deficient partially due to the complex and dynamic interaction between marine and terrestrial salinity sources including return flows by water users of the different water sectors in the Euphrates and Tigris rivers upstream of the SAR The development of a new series of monitoring stations and various modelling approaches helped to better understand the interactions between these different sources The comprehensive and detailed dataset formed the basis for a validated analytical model that can predict the extent of seawater relative to other salinity sources in an estuary and for a hydrodynamic model that can predict salinity changes The adaptability of the models to changing conditions makes them directly applicable by water managers The procedure can be applied to other comparable systems *International Energy and Poverty* Lakshman Guruswamy, 2015-08-20 Around 2.8 billion people globally also known as the Other Third or energy poor have little or no access to beneficial energy that meets their needs for cooking heating water sanitation illumination transportation or basic mechanical power This book uniquely integrates the hitherto segmented and fragmented approaches to the challenge of access to energy It provides theoretical philosophical and practical analysis of energy for the low energy non hydrocarbon based Other Third of the world and how the unmet needs of the energy poor might be satisfied It comprehensively addresses the range of issues relating to energy justice and energy access for all including affordable sustainable energy technologies ASETs The book breaks new ground by crafting a unified and cohesive framework for analysis and action that explains the factual and socio political phenomenon of the energy poor and demonstrates why clean energy is a primary determinant of their human progress This is a must read for all scholars students professionals and policy makers working on energy policy poverty and sustainable energy technologies **World Economic and Social Survey 2013** United Nations. Department of Economic and Social Affairs, 2013 This volume contributes to the deliberations on addressing sustainable development challenges with a focus on three important cross sectoral issues identified for action and follow up at the 2012 United Nations Conference on Sustainable Development sustainable cities food security and energy transformation page four of cover **Food Security Governance** Nora McKeon, 2014-12-17 This book fills a gap in the literature by setting food security in the context of evolving global food governance Today's food system generates hunger alongside of food waste burgeoning health problems massive greenhouse gas emissions Applying food system analysis to review how the international community has addressed food issues since World War II this book proceeds to explain how actors link up in corporate global food chains and in the local food systems that feed most of the world's population It

unpacks relevant paradigms from productivism to food sovereignty and highlights the significance of adopting a rights based approach to solving food problems The author describes how communities around the world are protecting their access to resources and building better ways of producing and accessing food and discusses the reformed Committee on World Food Security a uniquely inclusive global policy forum and how it could be supportive of efforts from the base The book concludes by identifying terrains on which work is needed to adapt the practice of the democratic public sphere and accountable governance to a global dimension and extend its authority to the world of markets and corporations This book will be of interest to students of food security global governance development studies and critical security studies in general **Hun**

**Sen's Cambodia** Sebastian Strangio, 2014-01-01 A fascinating analysis of the recent history of the beautiful but troubled Southeast Asian nation of Cambodia To many in the West the name Cambodia still conjures up indelible images of destruction and death the legacy of the brutal Khmer Rouge regime and the terror it inflicted in its attempt to create a communist utopia in the 1970s Sebastian Strangio a journalist based in the capital city of Phnom Penh now offers an eye opening appraisal of modern day Cambodia in the years following its emergence from bitter conflict and bloody upheaval In the early 1990s Cambodia became the focus of the UN s first great post Cold War nation building project with billions in international aid rolling in to support the fledgling democracy But since the UN supervised elections in 1993 the nation has slipped steadily backward into neo authoritarian rule under Prime Minister Hun Sen Behind a mirage of democracy ordinary people have few rights and corruption infuses virtually every facet of everyday life In this lively and compelling study the first of its kind Strangio explores the present state of Cambodian society under Hun Sen s leadership painting a vivid portrait of a nation struggling to reconcile the promise of peace and democracy with a violent and tumultuous past *Mobile and Ubiquitous Learning*

essential guidance in making innovations for the new generations of learners in the 21st century      **Territorial Cohesion in Rural Europe** Andrew K. Copus, Philomena de Lima, 2014-08-13 This book reflects on how the economies social characteristics ways of life and global relationships of rural areas of Europe have changed in recent years This reveals a need to refresh the concepts we use to understand measure and describe rural communities and their development potential This book argues that Europe has outgrown many of the stereotypes usually associated with it with substantial implications for European Rural Policy Rural structural change and its evolving geography are portrayed through regional typologies and the concept of the New Rural Economy Demographic change migration business networks and agricultural restructuring are each explored in greater detail Implications for equality and social exclusion and recent developments in the field of governance are also considered Despite being a subject of active debate interventions in the fields of rural and regional development have failed to adapt to changing realities and have become increasingly polarized This book argues that rural regional policy needs to evolve in order to address the current complex reality partially reformulating territorial or place based approaches and the New Rural Paradigm following a set of principles termed Rural Cohesion Policy      Principles of Economics Volume 2 of 2 Textbook Equity Edition, 2014-03-31 This is Volume 2 of 2 covering Chapters 24 34 and the appendices See [www.textbookequity.org/principles of economics](http://www.textbookequity.org/principles-of-economics) Excerpt Principles of Economics is designed for a two semester principles of economics sequence The text has been developed to meet the scope and sequence of most introductory courses At the same time the book includes a number of innovative features designed to enhance student learning Instructors can also customize the book adapting it to the approach that works best in their classroom The pedagogical choices chapter arrangements and learning objective fulfillment were developed and vetted with feedback from educators dedicated to the project They thoroughly read the material and offered critical and detailed commentary The outcome is a balanced approach to micro and macro economics to both Keynesian and classical views and to the theory and application of economics concepts Current events are treated in a politically balanced way as well      Oil Palm Breeding Aik Chin Soh, Sean Mayes, Jeremy A. Roberts, 2017-08-14 The oil palm is a remarkable crop producing around 40% of the world s vegetable oil from around 6% of the land devoted to oil crops Conventional breeding has clearly been the major focus of genetic improvement in this crop A mix of improved agronomy and management coupled with breeding selection have quadrupled the oil yield of the crop since breeding began in earnest in the 1920s However as for all perennial crops with long breeding cycles oil palm faces immense challenges in the coming years with increased pressure from population growth climate change and the need to develop environmentally sustainable oil palm plantations In Oil Palm Breeding Genetics and Genomics world leading organizations and individuals who have been at the forefront of developments in this crop provide their insights and experiences of oil palm research while examining the different challenges that face the future of the oil palm The editors have all been involved in research and breeding of oil palm for many years and use their knowledge of the

crop and their disciplinary expertise to provide context and to introduce the different research topics covered

*Ecophysiology of root systems-environment interaction* Boris Rewald, Omer Falik, Douglas Godbold, Shimon Rachmilevitch, 2014-09-03 There is a scarcity of detailed information regarding the ecophysiology of root systems and the way root system functioning is affected by both internal and external factors Furthermore global climate change is expected to increase the intensity of climate extremes such as severe drought heat waves and periods of heavy rainfall in addition other stresses such as salinization of soils are increasing world wide Recently an increasing awareness has developed that understanding plant traits will play a major role in breeding of future crop plants For example there is increasing evidence that the traits of root systems are defined by the properties of individual roots However further knowledge on the functional importance of root segments and the molecular physiological mechanisms underlying root system functioning and persistence is needed and would specifically allow modifying crop root system functionality and efficiency in the future Another major gap in knowledge is localized at the root soil interface and in regard to the potential adaptive plasticity of root rhizosphere interactions under abiotic stress and or competition It is currently unknown whether adaptations in microbe communities occur for example due to modified exudation rates and what are the subsequent influences on nutrient mobilization and uptake Furthermore uncovering the mechanisms by which roots perceive neighboring roots may not only contribute to our understanding of plant developmental strategies but also has important implications on the study of competitive interactions in natural communities and in optimizing plant performance and resource use in agricultural and silvicultural systems In this Research Topic we aimed to provide an on line open access snapshot of the current state of the art of the field of root ecology and physiology with special focus on the translation of root structure to function and how root systems are influenced by interplay with internal and external factors such as abiotic stress microbes and plant plant interaction We welcomed original research papers but reviews of specific topics articles formulating opinions or describing cutting edge methods were also gladly accepted
