Perkin Elmer Infrared Manual 1420:

Instruction Manual, Infrared Spectrometer Model 12C. Perkin-Elmer Corporation,1949 SAM-TR. ,1967-02

Applied Infrared Spectroscopy A. Lee Smith,1979-07-09 Presents an overview of applications a critical evaluation of current techniques for sampling and for obtaining spectra and an extensive guide to the literature both spectra and papers Covers everything from how to prepare almost any kind of sample and how to optimize the controls on an infrared spectrometer to identifying and measuring pollutants at the parts per million level Stresses all fundamental concepts and limitations includes examples of difficulties and pitfalls throughout Emphasizes development of technique and careful manipulation of samples and spectrometers Highlights quantitative analysis with examples Also reviews factors affecting group frequencies **Report (USAF School of Aerospace Medicine). [1-24], [1967] ,1967 Scientific and Technical Aerospace Reports ,1986 Drug Development for Parasite-induced Diarrheal Diseases** Anjan Debnath,James H. McKerrow,2017-08-25 One of the top four contributors to the global burden of disease is diarrheal infections Intestinal parasites are major causes of morbidity and mortality associated with diarrheal diseases in both the developed and developing world Amebiasis is responsible for 50 million cases of invasive disease and 70 000 deaths annually in the world Giardiasis has an estimated worldwide prevalence of 280 million cases annually In developed countries Giardia lamblia infects about 2% of adults and 6 8% of children The prevalence of G lamblia infection is generally higher in developing countries ranging from 3% to 90% Furthermore giardial infections contribute substantially to the 2 5 million annual deaths from diarrheal disease In Asia Africa and Latin America about 500 000 new giardiasis cases are reported each year Cryptosporidium accounts for 20% and 9% of diarrheal episodes in children in developing and developed countries respectively Infection with Cryptosporidium can be chronic and especially debilitating in immunosuppressed individuals and malnourished children A recent study to measure disease burden based on disability adjusted life years DALYs found that cryptosporidiosis and amebiasis produce about 10 6 million DALYs This exceeds the DALYs of any helminth infection currently being targeted by the World Health Organization for preventive chemotherapy Because of its link with poverty Giardia and Cryptosporidium were included in the WHO Neglected Diseases Initiative in 2004 E histolytica G lamblia and C parvum have been listed by the National Institutes of Health NIH as category B priority biodefense pathogens due to low infectious dose and potential for dissemination through compromised food and water supplies in the United States Despite the prevalence of amebiasis giardiasis and cryptosporidiosis there are no vaccines or prophylactic drugs The first line drugs for invasive amebiasis and giardiasis chemotherapy are nitroimidazoles with the prototype metronidazole being the most common drug used worldwide Metronidazole has been shown to be both mutagenic in a microbiological system and carcinogenic to rodents and frequently causes gastrointestinal side effects In spite of the efficacy of nitroimidazole drugs treatment failures in giardiasis occur in up to 20% of cases Clinical resistance of G lamblia to metronidazole is proven and

cross resistance is a concern with all commonly used anti-giardial drugs Nitazoxanide the only FDA approved drug for the treatment of cryptosporidiosis is effective in the treatment of immunocompetent patients and partially effective for immunosuppressed patients Therefore it is critical to search for more effective drugs to treat amebiasis giardiasis and cryptosporidiosis This Research Topic for Frontiers in Microbiology will explore the recent progress in drug development for parasitic diarrheal diseases This includes an understanding of drug resistance mechanisms We would also welcome submissions on the drug development for other diarrheal parasites We hope that this research topic will include a comprehensive survey of various attempts by the parasitology research community to create effective drugs for these diseases
