business and management students Sam Smart is the budding entrepreneur on whom the case study at the heart of this book is based. Featured at the start of each chapter, we follow Sam as he goes from starting a small business printing sports kits for local teams to managing a global sports business. Throughout the course of the book, he assesses the success of his business, finances, activities, makes pricing decisions, opens new branches, looks at cash flow, and facilitates planning, control, and investment. As we follow the case study, the core topics central to accounting are covered with clarity, imagination, and relevance, giving students the support they need to complete their course and exams with confidence. The wealth of additional examples and self-test exercises available alongside the case study enable students not only to develop an appreciation of how accounting information allows a manager to make key business decisions but also to acquire the skills necessary to enable them to converse with accountants and challenge their assumptions and methodologies. This book is accompanied by the following online resources: For Students: Multiple choice questions, Additional practice questions with answers, Flashcard glossary, Tables from the text. For Lecturers: Test bank, PowerPoint presentations, Solutions to end of part case studies, Additional end of part case studies with solutions, Assessment guide, Double entry chapters.

Collective Goods and Higher Education Research Roger Benjamin, 2018-09-19 With this volume the author demonstrates how a collective goods approach to higher education research can alleviate problems of rising costs declining resources and growing concerns about undergraduate learning In taking this approach the author presents new tools of analysis borrowed from cognitive science economics data

analytics education technology and measurement science to investigate higher education's place in society as a public or private good. By showing how these tools can be utilized to re-orient current research, this volume offers scholars and policy makers an argument for the large-scale use of scientific and economic approaches to higher education's most pressing issues.

English as a Medium of Instruction in Higher Education Wenli Tsou, Shin-Mei Kao, 2017-06-13. This book presents the multiple facets of English as a Medium of Instruction (EMI) in higher education across various academic disciplines, an area that is expected to grow constantly in response to the competitive global higher education market. The studies presented were conducted in various EMI classrooms with data collected from observing and documenting the teaching activities and from interviewing or surveying EMI participants. Through data analysis and synthesis, cases across disciplines from engineering, science, technology, business, social science, medical science, design, and arts to tourism and leisure service sectors are used to illustrate the various EMI curriculum designs and classroom practices. Although the cases described are limited to Taiwanese institutions, the book bridges the gap between planning and executing EMI programs across academic domains for policy makers, administrators, content teachers, and teacher trainers throughout Asia.
