On the Origin of Products Arthur O. Eger,Huub Ehlhardt,2018-02-15 In this new work Arthur O Eger and Huub Ehlhardt present a Theory of Product Evolution They challenge the popular notion that we owe the availability of products solely to genius inventors Instead they present arguments that show that a process of variation selection and accumulation of know how to make and know what function to realize provide an explanation for the emergence of new types of products and their subsequent development into families of advanced versions This theory employs a product evolution diagram as an analytical framework to reconstruct the development history of a product family and picture it as a graphical narrative The authors describe the relevant literature and case studies to place their theory in context The Product Phases Theory is used to create predictions on the most likely next step in the evolution of a product offering practical tools for those involved in new product development

Sensor Analysis for the Internet of Things Michael Stanley,Jongmin Lee,2022-06-01 While it may be attractive to view sensors as simple transducers which convert physical quantities into electrical signals the truth of the matter is more complex The engineer should have a proper understanding of the physics involved in the conversion process including interactions with other measurable quantities A deep understanding of these interactions can be leveraged to apply sensor fusion techniques to minimize noise and or extract additional information from sensor signals Advances in microcontroller and MEMS manufacturing along with improved internet connectivity have enabled cost effective wearable and Internet of Things sensor applications At the same time machine learning techniques have gone mainstream so that those same applications can now be more intelligent than ever before This book explores these topics in the context of a small set of sensor types We provide some basic understanding of sensor operation for accelerometers magnetometers gyroscopes and pressure sensors We show how information from these can be fused to provide estimates of orientation Then we explore the topics of machine learning and sensor data analytics
