*Introductory Statistics* Textbook Equity Edition, 2014-02-09 *Introductory Statistics* is designed for the one semester introduction to statistics course and is geared toward students majoring in fields other than math or engineering. This text assumes students have been exposed to intermediate algebra and it focuses on the applications of statistical knowledge rather than the theory behind it. The foundation of this textbook is *Collaborative Statistics* by Barbara Illowsky and Susan Dean. Additional topics, examples, and ample opportunities for practice have been added to each chapter. The development choices for this textbook were made with the guidance of many faculty members who are deeply involved in teaching this course. These choices led to innovations in art terminology and practical applications, all with a goal of increasing relevance and accessibility for students. We strove to make the discipline meaningful so that students can draw from it a working knowledge that will enrich their future studies and help them make sense of the world around them.
