Art in the Age of the Internet Eva Respini, 2018-01-01. Art in the Age of the Internet 1989 to Today is the first major thematic group exhibition in the United States to examine the radical impact of internet culture on visual art. Featuring 60 artists, collaborations and collectives, the exhibition is comprised of over 70 works across a variety of mediums including painting, performance, photography, sculpture, video, web-based projects and virtual reality. The exhibition is divided into five sections that explore themes such as emergent ideas of the body and notions of human enhancement, the internet as a site of both surveillance and resistance, the circulation and control of images and information, the possibilities for exploring identity and community afforded by virtual domains and new economies of visibility accelerated by social media. Throughout the work in the exhibition addresses the internet age democratization of culture that comprises our current moment. The earliest work in the exhibition is from 1989, the year that Tim Berners-Lee invented the World Wide Web. This development and others that followed in quick succession modernized the internet and in the process radically changed our way of life from how we access and generate information, make friends and share experiences to how we imagine our future, bodies and how nations police national security. 1989 also marked a watershed moment across the globe with significant shifts in politics, geographies and economies. Events such as the fall of the Berlin Wall and protests in Tiananmen Square signaled the beginning of our current globalized age which cannot be imagined without the internet.

Near Field Communication Sheli McHugh, Kristen Yarmey, 2022-05-31. Near Field Communication is a radio frequency technology that allows objects such as mobile phones, computers, tags or posters to exchange information wirelessly across a small distance. This report on the progress of Near Field Communication reviews the features and functionality of the technology and summarizes the broad spectrum of its current and anticipated applications. We explore the development of NFC technology in recent years, introduce the major stakeholders in the NFC ecosystem and project its movement toward mainstream adoption. Several examples of early implementation of NFC in libraries are highlighted, primarily involving the use of NFC to enhance discovery by linking books or other physical objects with digital information about library resources but also including applications of NFC to collection management and self-checkout. Future uses of NFC in libraries such as smart posters or other enhanced outreach are envisioned as well as the potential for the touch paradigm and Internet of things to transform

the ways in which library users interact with the information environment Conscious of the privacy and security of our patrons we also address continuing concerns related to NFC technology and its expected applications recommending caution awareness and education as immediate next steps for librarians *Mobile User Research* Sunny Consolvo, Frank R. Metropolitan Home ,2007 **Lean CX** Robert Dew, Bill Russell, Cyrus Allen, George Bej, 2021-04-06 In recent years many companies have realised customer experience CX is the new marketing battle ground Substantial investments have been made to map customer journeys identify pain points and improve CX to try and create cut through Using real world applications to introduce next generation design tools based on proven concepts from strategy marketing psychology and creative problem solving Lean CX How to Differentiate at Low Cost and Least Risk discusses how to use Lean Management approaches to innovate your customer experience This practical book describes how the tools from Lean Management can be applied to the CX innovation problem The authors draw on hundreds of CX design and strategic innovation projects across a range of industries both B2B and B2C from primary research through client work and secondary case studies available in the public domain The examples include many different vertical industry sectors including those involving hybrid business models The cases included share what worked really well and where CX failed The content goes beyond what actually happened to present an idea of what might be possible with the right design approach and committed resources Presents the swarm algorithm which highlights what the next generation of successful organisations might become Shows how to overcome the CX change risk and reduce the biggest waste in CX management Includes numerous international case examples **The Merger Mindset** Constance Dierickx, Linda Henman, 2018-12-20 Breaking Up Is Hard to Do offers a unique perspective for leaders those executives whose companies reputations and futures will thrive or fail because of a deal or a series of deals This book for leaders helps decision makers deal with the powerful undercurrents and interpersonal dynamics at play in every deal and no one is more qualified to write it than Constance Dierickx and Linda Henman Other books on mergers acquisitions and divestitures overwhelmingly have one characteristic in common they re technical Attorneys write books about the legal and contractual aspects of deals project management experts write from the point of

view of managing tasks and schedules and investment bankers write about valuation and negotiation *Breaking Up Is Hard to Do* presents an amalgamation of what Drs Dierickx and Henman have observed and in many cases helped to create in more than 65 cumulative years of consulting with Fortune 500 companies privately held firms family owned businesses and military organizations Their in the trenches experiences spurred them to arrive at this premise To position their organizations for more success leaders can't shy away from the high stakes tough decisions about their futures This book maps the key steps in the M A journey It takes the reader through how to make the decision to grow acquisitively identify roadblocks and typical wrong turns and ultimately shows how to unlock their decision making potential while navigating an increasingly uncertain world Through compelling stories and surprising research findings readers will discover that there's much more to the decision making that drives M A deals than they ever imagined and they will come away with tools to help them deepen their understanding of what it takes to succeed A fascinating read the text weaves lessons that surface from the stories with highly pragmatic advice about suggested mindset checklists processes and diagnostic tools Readers will understand that while M A deals aren't simple leaders don't have to overly complicate them either Instead they can simplify the process if they remember hope shouldn't serve as a strategy and they can't abdicate or delegate their leadership responsibilities The lessons from mergers and acquisitions are critical to those considering a deal but applied elsewhere they have equal value even though noticing them takes more effort This is the essence of leadership doing the hard work of ensuring that the gulf between strategy and tactics does not lead to either over simplification or needless complexity
