Postfeminism in Context Margaret Henderson, Anthea Taylor, 2019-10-21 Postfeminism in Context studies the representation of women in Australian popular culture over the past three decades to locate postfeminism in a specific time and place Margaret Henderson and Anthea Taylor argue that postfeminism as a critical term has been too often deployed in ways that fail to account for historical and cultural specificity This book analyses Australian popular culture chick lit novels dramedy television shows women's magazines YouTube beauty vlogs self help manuals and newspapers to reveal the tensions contradictions and ambiguities that have always been constitutive of postfeminism including in Australia Examining how these popular forms intervene in dominant conversations about contemporary Australian femininities Postfeminism in Context maps the ways in which various aspects of Australia's history and national identity have shaped its postfeminism While Henderson and Taylor identify some of the limited postfeminist tropes and patterns of representation evident in comparable locales they also find that Australian popular culture has responded to feminism in a much more hopeful way Adding some much needed cultural specificity to the ongoing debate around this loaded term Postfeminism in Context is essential reading for those interested in Australian popular culture feminism and the gendered politics of representation

The Tail Wags the Dog Efraim Karsh, 2015-08-11 The continuing crisis in Syria has raised questions over the common perception of Middle Eastern affairs as an offshoot of global power politics To Western intellectuals foreign policy experts and politicians empire and imperialism are categories that apply exclusively to Europe and more recently to the United States of America As they see it Middle Eastern history is the product of its unhappy interaction with these powers Forming the basis of President Obama's much ballyhooed new beginning between the United States and Muslims around the world this outlook is continuing to shape crucial foreign policy among Western governments but in these pages Efraim Karsh propounds a radically different interpretation of Middle Eastern experience He argues that the Western view of Muslims and Arabs as hapless victims is absurd On the contrary modern Middle Eastern history has been the culmination of long existing indigenous trends Great power influences however potent have played a secondary role constituting neither the primary force behind the region's political development nor the main cause of its notorious volatility Karsh argues it is only when Middle Eastern people disown their victimization mentality and take responsibility for their actions and their Western champions drop their condescending approach to Arabs and Muslims that the region can at long last look forward to a real spring
