transformative Thus the Baudelairean experiment illustrates the limits of romantic notions of originality creativity and genius reminding us that all writing is intrinsically intertextual It also shows the complexity of translation as a form of creation at the core of modern writing The book is one of the first of its kind to link the study the translational activity of a major writer to his creative writings It is also one of the first to provide an integrated presentation of French 19th century translation approaches and to link them to questions of copyright and authorship in the context of the rise of capitalism and romantic views of creation and genius It offers therefore a new perspective both on translation history and on literary history *Alchemy and Amalgam* will be of interest to students of translation comparative literature and French studies
