1. Show that the function $F(x) = (x-a)^2(x-b)^2 + x$ with $a < b$ has the value $(a+b)/2$ at some point x .

Solution:

$F(x)$ is a polynomial, so it is continuous for all $x \in \mathbb{R}$. We have

$$F(a) = (a-a)^2(a-b)^2 + a = 0 + a = a$$

$$F(b) = (b-a)^2(b-b)^2 + b = 0 + b = b$$

Since $a < b$, then $\frac{a+b}{2} \in (a, b) = (F(a), F(b))$.

Then we can get $F(x)$ is continuous and $\frac{a+b}{2}$ lies on the interval $[F(a), F(b)]$.

So by the IVT, there exists some point $c \in [a, b]$ such that $F(c) = \frac{a+b}{2}$.

5

2. Let $f(x)$ be a continuous function on $[a, b]$ whose range is $[a, b]$. Show that there is a point on the graph of $f(x)$ that intersects the line $y = x$. That is, show that there exists a number $c \in [a, b]$ such that $f(c) = c$.

Solution:

Let $g(x) = f(x) - x$. The function $f(x)$ is continuous on $[a, b]$ and so $g(x)$ is continuous on $[a, b]$.

We have:

$$a \leq f(x) \leq b$$

$$\text{Then we have } g(a) = f(a) - a \geq 0, \quad g(b) = f(b) - b \leq 0$$

So, by the IVT, there exists some point $c \in (a, b)$ such that $g(c) = 0$. Thus,

There exists $c \in (a, b)$ such that $f(c) - c = 0$ or $f(c) = c$.

3. a) Show that the function $h(x)$ defined by:

~~2~~

3

$$h(x) = \begin{cases} x^4 \sin\left(\frac{1}{x}\right) & , \quad x \neq 0 \\ 0 & , \quad x = 0 \end{cases}$$

is continuous on $(-\infty, \infty)$.

2

- b) Consider the function $g(x) = \tan^{-1} x + x^3 + 1$. Show that there exists $c \in [-1, 1]$ such that $g(c) = 0$.

Solution:

- a) The function $x^{-1} \sin \frac{1}{x}$ is continuous for all $x \neq 0$; so we need to check continuity at $x=0$:

$$h(0) = 0$$

$$\lim_{x \rightarrow 0} (h(x)) = \lim_{x \rightarrow 0} (x^4 \sin(\frac{1}{x})) = 0$$

Since $-1 \leq \sin \frac{1}{x} \leq 1$, we can get that $-x^4 \leq x^4 \sin \frac{1}{x} \leq x^4$.

Developing Assessments for the Next Generation Science Standards National Research Council, Division of Behavioral and Social Sciences and Education, Board on Science Education, Board on Testing and Assessment, Committee on Developing Assessments of Science Proficiency in K-12, 2014-05-29 Assessments understood as tools for tracking what and how well students have learned play a critical role in the classroom Developing Assessments for the Next Generation Science Standards develops an approach to science assessment to meet the vision of science education for the future as it has been elaborated in A Framework for K 12 Science Education Framework and Next Generation Science Standards NGSS These documents are brand new and the changes they call for are barely under way but the new assessments will be needed as soon as states and districts begin the process of implementing the NGSS and changing their approach to science education The new Framework and the NGSS are designed to guide educators in significantly altering the way K 12 science is taught The Framework is aimed at making science education more closely resemble the way scientists actually work and think and making instruction reflect research on learning that demonstrates the importance of building coherent understandings over time It structures science education around three dimensions the practices through which scientists and engineers do their work the key crosscutting concepts that cut across disciplines and the core ideas of the disciplines and argues that they should be interwoven in every aspect of science education building in sophistication as students progress through grades K 12 Developing Assessments for the Next Generation Science Standards recommends strategies for developing assessments that yield valid measures of student proficiency in science as described in the new Framework This report reviews recent and current work in science assessment to determine which aspects of the Framework's vision can be assessed with available techniques and what additional research and development will be needed to support an assessment system that fully meets that vision The report offers a systems approach to science assessment in which a range of assessment strategies are designed to answer different kinds of questions with appropriate degrees of specificity and provide results that complement one another Developing Assessments for the Next Generation Science Standards makes the case that a science assessment system that meets the Framework's vision should consist of assessments designed to support classroom instruction

assessments designed to monitor science learning on a broader scale and indicators designed to track opportunity to learn New standards for science education make clear that new modes of assessment designed to measure the integrated learning they promote are essential The recommendations of this report will be key to making sure that the dramatic changes in curriculum and instruction signaled by Framework and the NGSS reduce inequities in science education and raise the level of science education for all students

Creating Self-Regulated Learners Linda B. Nilson, 2023-07-03 Most of our students neither know how learning works nor what they have to do to ensure it to the detriment both of their studies and their development as lifelong learners The point of departure for this book is the literature on self regulated learning that tells us that deep lasting independent learning requires learners to bring into play a range of cognitive skills affective attitudes and even physical activities about which most students are wholly unaware and that self regulation which has little to do with measured intelligence can be developed by just about anyone and is a fundamental prerequisite of academic success Linda Nilson provides the theoretical background to student self regulation the evidence that it enhances achievement and the strategies to help students develop it She presents an array of tested activities and assignments through which students can progressively reflect on monitor and improve their learning skills describes how they can be integrated with different course components and on various schedules and elucidates how to intentionally and seamlessly incorporate them into course design to effectively meet disciplinary and student development objectives Recognizing that most faculty are unfamiliar with these strategies she also recommends how to prepare for introducing them into the classroom and adding more as instructors become more confident using them The book concludes with descriptions of courses from different fields to offer models and ideas for implementation At a time of so much concern about what our students are learning in college and how well prepared they are for the challenges of tomorrow's economy and society self regulated learning provides a reassuring solution particularly as

The Roles of Social Media in Education: Affective, Behavioral, and Cognitive Dimensions Hung Phu Bui, Mark Bedoya Ulla, Veronico N. Tarrayo, Chien Thang Pham, 2023-10-24 technologies in education A large body of research has attempted to measure the extent to which social media change human communication In education researchers and educators have employed social media to increase students engagement inside and outside the classroom They have been exploring the effects of the use of social media on the learning outcome and learners beliefs and experiences However some of their endeavors are inconclusive As the effects of social media in education are context sensitive research results reflecting different contexts around the world will contribute to the literature on social media and education Student engagement in learning a growing interest in educational research is widely believed to contribute to the success of learning The contemporary literature shows that students can engage in learning affectively behaviorally and cognitively Recent studies are also interested in using technology to mediate students social and metacognitive engagement in learning As student engagement is a multidimensional area interdisciplinary studies have recently expanded their literature The use of social media to increase student engagement in learning remains underexplored
