November 2014 Agriculture Memorandum:

The Future of Philippine Agriculture under a Changing Climate Mark W. Rosegrant, Mercedita A. Sombilla, 2018-11-30

The Philippine economy has grown rapidly since 2010 but despite this growth poverty and inequality remain high. Two thirds of the poor live in rural areas and the weak performance of the agriculture sector has contributed to the slow improvement in livelihoods. The challenge for agriculture will further increase with climate change posing a growing threat to the sector. But agricultural transformation to spur sustained growth and reduce poverty is still possible under climate change with aggressive institutional reforms and implementation of the right mix of policies and programmes. The identification of the suitable policy and programme combination requires an accurate assessment of the key drivers of agricultural growth and food security, the impacts of climate change on agriculture and the overall economy and the effectiveness of policies for adaptation and growth. This book addresses these big issues focusing on enhancing the adaptation capacity of the Philippine agriculture sector. It is designed to provide a much needed base of knowledge and menu of policy options to support decision and policymaking on agriculture, climate change and food security. The volume uses newly generated data, modelling outputs and innovative analyses to provide a scientific basis for a variety of adaptation measures under different sets of climate change scenarios to guide decision makers in strategic planning and policy formulation. As we have actually experienced in Leyte, an island province in the Visayas where Super Typhoon Yolanda Haiyan struck, disasters caused by natural hazards could completely negate economic gains, devastate families and shatter dreams. Our greatest challenge is to make ourselves better prepared for and be more resilient to such disasters. Natural hazards need not always lead to loss of so many lives and properties. This book shows us ways and provides tools to draw up climate change and socioeconomic scenarios at the regional and provincial levels, allowing us to identify strategies for mitigating climate change risks. Ernesto M. Pernia, Secretary of Socioeconomic Planning, National Economic and Development Authority, Philippines. This book by top Philippine researchers combines state of the art biophysical and economic modeling of climate impacts and adaptation policies with in depth synthesis of agriculture, natural resources, climate trends and policies. It provides a comprehensive assessment of climate change impacts on agriculture and the broader economy to provide important insights for Philippine policymakers. Dr. Cynthia Rosenzweig, Head, Climate Impacts Group, NASA Goddard Institute for Space Studies and Co-Founder of the Agricultural Model Inter-comparison and Improvement Project (AgMIP). Barons Austin Frerick, 2024-03-26. Best Books of 2024. Frerick's prose throughout is both direct and masterfully controlled, with every point supported by extensive references and notes. This is no alarmist screed but rather a careful, systematic and utterly damning demolition job, an exquisitely informed exposé. A genuinely revelatory look at mass food production in the United States. Kirkus Reviews starred. In this eye-opening debut study, Frerick, an agricultural policy fellow at Yale University, reveals the ill-gained stranglehold that a handful of companies have on America's food economy. It's a disquieting critique of private monopolization of public necessities.

Publishers Weekly starred *Barons* is the story of seven corporate titans their rise to power and the consequences for everyone else Take Mike McCloskey Chairman of Fair Oaks Farms In a few short decades he went from managing a modest dairy herd to running the Disneyland of agriculture where school children ride trams through mechanized warehouses filled with tens of thousands of cows that never see the light of day What was the key to his success Hard work and exceptional business savvy Maybe But more than anything else Mike benefitted from deregulation of the American food industry a phenomenon that has consolidated wealth in the hands of select tycoons and along the way hollowed out the nation's rural towns and local businesses Along with Mike McCloskey readers will meet a secretive German family that took over the global coffee industry in less than a decade relying on wealth traced back to the Nazis to gobble up countless independent roasters They will discover how a small grain business transformed itself into an empire bigger than Koch Industries with ample help from taxpayer dollars And they will learn that in the food business crime really does pay especially when you can bribe and then double cross the president of Brazil These and the other stories in this book are simply examples of the monopolies and ubiquitous corruption that today define American food The tycoons profiled in these pages are hardly unique many other companies have manipulated our lax laws and failed policies for their own benefit to the detriment of our neighborhoods livelihoods and our democracy itself *Barons* paints a stark portrait of the consequences of corporate consolidation but it also shows we can choose a different path A fair healthy and prosperous food industry is possible if we take back power from the barons who have robbed us of it

Global Economic Prospects, Volume 9, June 2014 World Bank World Bank, 2014-06-10 The global economy got off to a bumpy start this year but growth in 2015 and 2016 looks to be broadly on track Projections for developing countries in 2014 have been down downgraded by 0.5 percentage points to 4.8 percent mainly reflecting weak first quarter growth in the US due to weather and the conflict in Ukraine Going forward growth is projected to firm to 5.3 and 5.5 percent in 2015 and 2016 supported by easy global financial conditions and rebounding exports as high income countries continue to recover under the influence of a reduced drag from fiscal consolidation and improving labor markets Financial conditions will eventually tighten and when they do there is risk of further volatility Most developing countries are in good fiscal and financial shape but where vulnerabilities remain countries need to tighten policy to reduce the potential impact of external shocks Overall growth for developing countries will be solid but not strong enough to generate the income and employment gains needed to eliminate poverty by 2013 As a result countries need to focus on structural reform in order to lift growth in an enduring and sustainable manner

Making Sense of the Multilevel Governance of Migration Tiziana Caponio, 2021-11-22 This book examines the nexus between City Networks multilevel governance and migration policy Examining several City Networks operating in the European Union and the United States of America's multilevel political settings it brings migration research into conversation with both policy studies and political science One of the first comparative studies of City Networks and migration the book argues that multilevel governance is the result of a contingent process of converging interests and views between leaders in network

organisations and national governments the latter continuing to play a key gatekeeping role on this topical issue even in the supranational EU system

The Report: Algeria 2015 Oxford Business Group, 2015-12-12 Algeria is a country rich in history and situated in a strategically important region While its past has at times been turbulent the last decade has been one of relative peace Economic growth and development has followed driven primarily by advances in the hydrocarbons sector The fall in the international price of oil since mid 2014 however is having a substantial economic impact in particular on the country's trade balance and government finances On the positive side though the drop in prices is accelerating efforts to further diversify the economy pushing the government to open up the country to greater private and foreign investment in order to provide alternatives to state spending in part through measures to render the rigid investment environment more attractive

Global Economic Prospects, Volume 8, January 2014 World Bank, 2014-02-05 High income economies appear to be finally turning the corner contributing to a projected acceleration in global growth from 2.4 percent in 2013 to 3.2 percent this year 3.4 percent in 2015 and 3.5 percent in 2016 Overall growth in developing countries is projected to pick up modestly from 4.8 percent in 2013 to 5.3 percent this year 5.5 percent in 2015 and 5.7 percent in 2016 In the baseline the withdrawal of quantitative easing and its effect on the long end of U.S. interest rates is assumed to follow a relatively slow orderly trajectory If however the taper is met with an abrupt market adjustment capital inflows could weaken sharply placing renewed stress on vulnerable developing economies In a scenario where long term interest rates rise rapidly by 100 basis points capital inflows could decline by as much as 50 percent for several quarters
