More than Medicine Robert M. Kaplan, 2019-02-04 American science produces the best medical treatments in the world Yet U S citizens lag behind in life expectancy and quality of life Robert Kaplan marshals extensive data to make the case that U S health care priorities are sorely misplaced invested in attacking disease not in solving social problems that engender disease in the first place **Psychological Testing** Robert M. Kaplan, 2017-01-11 **Disease, Diagnoses, and Dollars**

Robert M. Kaplan, 2009-04-21 Disease Diagnoses and Dollars is about the costs of health care and their impact on health The U S health care system is the largest sector in the biggest economy and the US spends significantly more per capita on health care than any other country yet it ranks last among comparison nations on the major health indicators Within the U S there is evidence that regions that spend more do not have better outcomes and some evidence suggests that quality of care is lower in the regions that spend more not less on health care Robert Kaplan takes the controversial position that mass markets have been created for services that may offer little or no benefit to patients Many of these markets are for preventive medicine making healthy people a market for expensive pharmaceutical products and tests These include cancer screening tests and medications to control blood pressure cholesterol and glucose Kaplan forcefully argues that the overuse of medications and tests runs up the costs of health care As more employers drop health insurance for their employees when costs accelerate the expanded use of ineffective preventive medicine may have the unintended consequence of increasing the number of uninsured patients potentially damaging the health of others in the community The concluding chapters of Disease Diagnoses and Dollars offer suggestions for policy makers and for patients Methods for systematically evaluating the cost effectiveness of new guidelines are discussed The final chapter provides practical suggestions to enable patients to share in decisions about treatments or tests that can have uncertain benefits **Student Workbook for Kaplan/Saccuzzo S**

Psychological Testing Robert M. Kaplan, Dennis P. Saccuzzo, 1997 Dealing exclusively with psychological tests this work shows how such tests are constructed and how they are used Aimed at students the book makes use of informal discussions and contains real life examples *A Book About Love* Jonah Lehrer, 2017-07-25 Weaving together scientific studies from

clinical psychologists longitudinal studies of health and happiness historical accounts and literary depictions child rearing manuals and the language of online dating sites Jonah Lehrer's *A Book About Love* plumbs the most mysterious most formative most important impulse governing our lives Love confuses and compels us and it can destroy and define us It has inspired our greatest poetry defined our societies and our beliefs and governs our biology From the way infants attach to their parents to the way we fall in love with another person to the way some find a love for God or their pets to the way we remember and mourn love after it ends this book focuses on research that attempts even in glancing ways to deal with the long term and the everyday The most dangerous myth of love is that it's easy that we fall into the feeling and then the feeling takes care of itself While we can easily measure the dopamine that causes the initial feelings of falling in love the partnerships and devotions that last decades or longer remain a mystery This book is about that mystery Love Lehrer argues is not built solely on overwhelming passion but fascinatingly on a set of skills to be cultivated over a lifetime

The Man Who Killed Apartheid: The Life of Dimitri Tsafendas Harris Dousemetzis, 2024-03-04 On 6 September 1966 inside the House of Assembly in Cape Town Dimitri Tsafendas stabbed to death Hendrik Verwoerd South Africa's Prime Minister and so called architect of apartheid Tsafendas was immediately arrested and before he had even been questioned by the authorities they declared him a madman without any political motive for the killing In the Cape Supreme Court Tsafendas was found unfit to stand trial on the grounds that he suffered from schizophrenia and that he had no political motive for killing Verwoerd Tsafendas spent the next 28 years in custody making him the longest serving detainee in South African history For most of his incarnation he was subjected to cruel and inhumane treatment by the prison authorities From 2009 to 2018 Harris Dousemetzis extensively researched the assassination of Verwoerd and the life of Tsafendas For this research he travelled to South Africa Mozambique Greece France and Turkey and interviewed about 150 people who either knew Tsafendas or Verwoerd or were involved with the case of the assassination He discovered about 12 000 pages of documents on the case most of them previously unpublished in archival collections in South Africa Portugal and the UK Dousemetzis collaborated with prominent South African jurists psychiatrists and psychologists and concluded his research by writing the Report to the Minister of Justice in the Matter of Dr Verwoerd's Assassination The report conclusively proved that Tsafendas had assassinated Verwoerd for political reasons and that the apartheid authorities had orchestrated a massive operation to declare him insane and apolitical This ground breaking report and this book corrected the historical record regarding Verwoerd's assassination and Tsafendas The Man Who Killed Apartheid based on Dousemetzis's groundbreaking research chronicles in detail Tsafendas's life and conclusively demonstrates that he was a perfectly sane and deeply political person with a long history of political activism At the same time the book exposes the lie at the heart of apartheid's posture on the assassination of Hendrik Verwoerd and provides a rare picture of how the racist regime operated and what it was like to live and die under apartheid

CONSCIOUS THEORY Luke Way, 2012-01-27 The world around us is full of countless laws for which we as human beings abide by to keep the process of human evolution moving in an acceptable manner Yet within our own minds we have yet to discover the laws for which success and happiness await every person This book *Conscious Theory* will leave you asking yourself a question what do I know about myself and my own mind Have you ever been stumbling through your life and just wondered why you can't seem to get it right Have you contemplated a change in your life for the better yet turned it down and run for safety to what was familiar instead of striving for the new goal If you have ever wondered these thoughts throughout your life then *Conscious Theory* will open doors for you *Conscious Theory* is not just a book it's an introspection of the evolvement of our very nature The price you pay for this book is a one off payment yet the cost of not understanding yourself and the power that awaits you could be staggering So with this in mind I offer my hand in friendship and hope that you will discover amongst these pages the value of understanding who you really are and above all else what you really can be Because what we were yesterday should never be a reflection of what we can choose to be tomorrow

More Than Medicine Robert Malcolm Kaplan, 2019 American science produces the best and most expensive medical treatments in the world Yet U S citizens lag behind their global peers in life expectancy and quality of life

Robert Kaplan brings together extensive data to make the case that health care priorities in the United States are sorely misplaced. America's medical system is invested in attacking disease but not in addressing the social, behavioral, and environmental problems that engender disease in the first place. Medicine is important but many Americans act as though it were all important. The U.S. stakes much of its health funding on the promise of high-tech diagnostics and miracle treatments while ignoring strong evidence that many of the most significant pathways to health are nonmedical. Americans spend millions on drugs to treat high cholesterol, for example, which increase life expectancy by six to eight months on average. But they underfund education, which might extend life expectancy by as much as twelve years. Wars on infectious disease have paid off, but clinical trials for chronic conditions costing billions rarely confirm that new treatments extend life. By comparison, the National Institutes of Health spends just 3 percent of its budget on research in social and behavioral determinants of health, even though these factors account for 50 percent of premature deaths. America's failure to take prevention seriously costs lives. More than Medicine argues that we need a shake-up in how we invest resources, and it offers a bold new vision for longer, healthier living.
