Innovation 4e Biz Jets Almarin Phillips,A. Paul Phillips,Thomas R. Phillips,2012-12-06 Biz Jets Technology and Market
Structure in the Corporate Jet Aircraft Industry traces the development of business jet aircraft from the mid 1950s through
early 1993 It begins with a discussion of the technological and market opportunities existing in the period prior to the
introduction of the Lockheed JetStar and the North American Sabreliner The subsequent appearances of other biz jets the
Learjets HS 125s Jet Commanders Falcons Gulfstreams Citations Challengers Mitsubishis and derivative aircraft are treated
in considerable detail Biz Jets also covers planes involved in many unsuccessful attempts to enter the industry from 1955
through 1993 The study shows that while the industry has been quite concentrated throughout its history the positions of the
leading firms have always been contestable Indeed leaders at one point in time have often been displaced by others who
succeeded in marshalling technological and market opportunities to their advantage Manufacturers have had to undertake
continuous efforts to improve the price performance characteristics of their aircraft to gain and hold their market shares
Rivalries in the effective use of the stream of new technologies have brought forth new aircraft with both better performance
and lower operating costs At the same time however participation in the market has been extremely risky Only a few
companies have been able to earn profits Entries exits and mergers have altered the structure of the industry but it remained
decidedly unstable at least through 1992 *Moody's Industrial Manual* ,1996 Covering New York American regional stock
