Shipbuilding and Ship Repair Workers around the World Raquel Varela, Hugh Murphy, Marcel Linden, 2025-10-01
Maritime trade is the backbone of the world's economy. Around ninety percent of all goods are transported by ship and since World War II shipbuilding has undergone major changes in response to new commercial pressures and opportunities. Early British dominance for example was later undermined in the 1950s by competition from the Japanese who have since been overtaken by South Korea and most recently China. The case studies in this volume trace these and other important developments in the shipbuilding and ship repair industries as well as workers' responses to these historic transformations.

The Big Book, 2007 **British Journal of Photography**, 2007 Circular Economy and Sustainable Development
Alexandros I. Stefanakis, Ioannis E. Nikolaou, 2024-10-22 This book will highlight the role of CE in the sustainability field as it is expressed in the various fields and disciplines and its contribution to building a sustainable society by providing a better understanding of the relevant social and cultural structures and the need for cross-disciplinary knowledge and diverse skills. Such an integrated approach which combines the concept of sustainability in the engineering field to create a CE has not yet been presented in detail in the published literature and there are only scattered studies covering only small parts of this holistic approach. Hence this book will represent a single reference that will provide summarized information and state of the art knowledge on this topic of the future. The book will include chapters showcasing investigating the relation between circular economy principles and their realization in different engineering fields. This includes theoretical justification, research studies and full-scale case studies. The approach focuses on two distinct levels: macro and micro on both production and consumption sides. *Shipcare & Maritime Management*, 1980 **Arab shipping**, 1989 **Lloyd's Maritime Directory**, 1996 **Designing Connected Products** Claire Rowland, Elizabeth Goodman, Martin Charlier, Ann Light, Alfred Lui, 2015-05-18 Networked thermostats, fitness monitors and door locks show that the Internet of Things can and will enable new ways for people to interact with the world around them. But designing connected products for consumers brings new challenges beyond conventional software UI and interaction design. This book provides experienced UX designers and technologists with a clear and practical roadmap for approaching consumer product strategy and design in this novel market. By drawing on the best of current design practice and academic research, *Designing Connected Products* delivers sound advice for working with cross-device interactions and the complex ecosystems inherent in IoT technology.
