Handbook of the Politics of the Arctic Leif Christian Jensen, Geir Hønneland, 2015-09-25 The Arctic has again become one of the leading issues on the international foreign policy agenda in a manner unseen since the Cold War Drawing on the perspectives of geo politics and international law this Handbook offers fresh insights and perspectives on the most pressing issues grouped under the headings of political ascendancy climate and environmental issues resources and energy and the response and policies of affected countries *World Development Report 2015* World Bank, 2014-12-04 Development economics and policy are due for a redesign In the past few decades research from across the natural and social sciences has provided stunning insight into the way people think and make decisions Whereas the first generation of development policy was based on the assumption that humans make decisions deliberatively and independently and on the basis of consistent and self interested preferences recent research shows that decision making rarely proceeds this way People think automatically when deciding they usually draw on what comes to mind effortlessly People also think socially social norms guide much of behavior and many people prefer to cooperate as long as others are doing their share And people think with mental models what they perceive and how they interpret it depend on concepts and worldviews drawn from their societies and from shared histories The World Development Report 2015 offers a concrete look at how these insights apply to development policy It shows how a richer view of human behavior can help achieve development goals in many areas including early childhood development household finance productivity health and climate change It also shows how a more subtle view of human behavior provides new tools for interventions Making even minor adjustments to a decision making context designing interventions based on an understanding of social preferences and exposing individuals to new experiences and ways of thinking may enable people to improve their lives The Report opens exciting new avenues for development work It shows that poverty is not simply a state of material deprivation but also a tax on cognitive resources that affects the quality of decision making It emphasizes that all humans including experts and policy makers are subject to psychological and social influences on thinking and that development organizations could benefit from procedures to improve their own deliberations and decision making It demonstrates the need for more discovery learning and adaptation in policy design and implementation The new approach to development economics has immense promise Its scope of application is vast This Report introduces an important new agenda for the development community **Globalization** George Ritzer, Paul Dean, 2019-02-26 A concise exploration of globalization and its role in the contemporary era Driven by technological advancements and global corporations more and more people are swept up by globalizing processes creating new winners and losers Globalization The Essentials explores the flows structures processes and consequences of globalization in the modern economic political and cultural landscape This comprehensive introduction offers balanced coverage of areas such as global economic and cultural flows environmental sustainability the impact of technology and racial economic and gender

inequality providing readers with foundational knowledge of globalization Extensively revised and updated this second edition includes expanded coverage of human trafficking and migration global climate change fake news and information wars and transnational social movements with increased emphasis on examples from Central and South America Africa and Asia Offers a straightforward approach to the multiple facets of globalization and their positive and negative influences on contemporary society Employs unique metaphors and a coherent narrative structure to promote intuitive understanding of abstract concepts Introduces cutting edge research updated statistics and real world examples in areas such as rising global populism social justice movements blockchain technology and cryptocurrencies Provides an efficient and flexible pedagogical structure allowing integration with instructor s own course material Emphasizing student comprehension a wide range of source material is incorporated including empirical research relevant theories newspaper and magazine articles and popular books and monographs Examples of current research and recent global developments such as emerging economies and global health concerns encourage classroom discussion and promote independent study Globalization The Essentials a compact edition of the authors full sized textbook Globalization A Basic Text provides concise coverage of the central concepts of this dynamic field Offering a multidisciplinary approach this textbook is an invaluable primary or supplemental resource for undergraduate study in any social science field as well as coursework on economics migration inequality and stratification and politics

Turn Down the Heat World Bank Publications,2014-11-20 A Report for the World Bank by the Potsdam Institute for Climate Impact Research and Analytics *Economics Of Environment, Climate Change, And Wine: Selected Papers Of Robert N Stavins, Volume 3 (2011-2023)* Robert N Stavins,2025-04-29 Robert N Stavins has been one of the most influential voices in environmental economics and policy over the past three decades Written by Stavins and his co authors the selected articles and essays in this book were originally published in a diverse set of leading scholarly periodicals They are collected here for the first time The book begins with an introductory essay where Stavins reflects on the professional path leading to his research and writing identifying common themes that emerged from his research This book discusses environmental policy in detail unpacking policy instruments and scrutinizing both domestic and international policy Policies are examined in relation to The Paris Agreement It concludes with a section on wine production and consumption This is the third volume of Stavins selected papers following Volume 1 1988 1999 and Volume 2 2000 2011 Students scholars practitioners and policymakers will find this volume a very valuable and useful addition to their collection

An Introduction to the Green Economy Adrian C. Newton,Elena Cantarello,2014-08-13 The green economy is widely seen as a potential solution to current global economic and environmental crises and a potential mechanism by which sustainable development might be achieved in practice Considerable investments are now being made into the development of green technology renewable energy biodiversity conservation resource efficiency recycling of materials and green infrastructure This textbook provides a comprehensive introduction to the green economy using a strongly interdisciplinary approach based

on environmental science rather than treating it as a sub set of economics The scientific principles of sustainability are presented which provide the foundations of the green economy with a particular focus on systems based approaches Examples of real world case studies are used to illustrate how the green economy can be achieved in practice In this way the authors provide a thorough overview of both the principles and practice of the green economy drawing from a wide range of disciplines including ecology geography social science psychology sustainability science environmental science law and economics The emphasis is on presenting results of the latest research derived from leading scientific journals Rather than focusing on a single definition of what constitutes a green economy the book introduces readers to the diversity of opinion that exists and engages them in what is an active on going debate This reflects the fact that many aspects of the green economy and sustainable development more generally are currently contested In particular the book will help readers to strengthen their ability to critically evaluate the evidence for and against the views presented and to actively contribute to the future development of the green economy
