Executive-legislative (Im)balance in the European Union Diane Fromage, Anna Herranz-Surrallés, 2021-02-11 Ten years after the entry into force of the Lisbon Treaty, executive predominance in EU related matters disappeared. How have executive legislative relations in the EU evolved over a crisis ridden decade from the financial and migration crises to Brexit and the COVID 19 pandemic? The Lisbon Treaty could be expected to lead to the re-balancing of powers in favour of parliaments for it significantly enhanced the roles of both the European Parliament and national parliaments. A decade later, the contributions to this edited volume examine for the first time in such an extensive breadth and from a multi-level and cross-policy perspective whether this has actually materialised. They highlight that diverging tendencies may be observed and that important variations over time have occurred depending particularly on the occurrence of crises. As stated in the fascinating epilogue by Peter Lindseth, University of Connecticut School of Law, this is an admirably coherent collective volume whose contributions provide an excellent overview of key aspects of executive legislative relations in the European system since the Treaty of Lisbon. This edited volume will hence be of interest to both academics and practitioners interested in future reforms designed at the European and national levels to improve the EU's democratic quality. **OECD Employment Outlook 2016** OECD, 2016-07-07 This 2016 edition of the OECD Employment Outlook provides an in-depth review of recent labour market trends and short-term prospects in OECD countries.
