**Multisensory in Stationary Retail** Gunnar Mau, Markus Schweizer, Christoph Oriet, 2023-02-07 This book describes how an optimal store design can contribute to the well being of the customer and to differentiation from online retail From an academic and practical perspective with contributions from renowned academics and companies it shows how a coherent store design can be created in harmony with the retail brand The central challenge here is the conscious orchestration of the diverse sensory stimuli How can the many sources of stimuli be controlled Which shelf shape goes with which light colour and sound Dealing with the variety of stimuli in a store environment can quickly become complex and incongruence can have a decisive negative impact on the well being of customers A customer centric store environment therefore focuses on the well being of people Renowned scientists and traders show the state of the science on these issues and give valuable suggestions for the trade With best practice examples and valuable suggestions for practical implementation

**Building Models for Marketing Decisions** Peter S.H. Lee, Dick R. Wittink, Michel Wedel, Philippe A. Naert, 2013-06-29 This book is about marketing models and the process of model building Our primary focus is on models that can be used by managers to support marketing decisions It has long been known that simple models usually outperform judgments in predicting outcomes in a wide variety of contexts For example models of judgments tend to provide better forecasts of the outcomes than the judgments themselves because the model eliminates the noise in judgments And since judgments never fully reflect the complexities of the many forces that influence outcomes it is easy to see why models of actual outcomes should be very attractive to marketing decision makers Thus appropriately constructed models can provide insights about structural relations between marketing variables Since models explicate the relations both the process of model building and the model that ultimately results can improve the quality of marketing decisions Managers often use rules of thumb for decisions For example a brand manager will have defined a specific set of alternative brands as the competitive set within a product category Usually this set is based on perceived similarities in brand characteristics advertising messages etc If a new marketing initiative occurs for one of the other brands

the brand manager will have a strong inclination to react The reaction is partly based on the manager s desire to maintain some competitive parity in the mar keting variables
