Rethinking International Relations Theory:

Rethinking International Relations Theory Martin Griffiths, 2011-03-02 International Relations IR theory has seen a proliferation of competing and increasingly trenchant worldviews with no consensus on how to evaluate their relative strengths and weakness This innovative new text provides an original interpretation of how best to navigate the clash of perspectives in contemporary IR theory The book provides a systematic overview of the main worldviews such as realism liberalism and constructivism and their associated theoretical underpinnings Placing liberal internationalism at the heart of the debate it argues that the main division in IR theory is between liberal internationalism and its critics Griffiths examines both the strengths and weaknesses of liberal internationalism as a worldview and also explores the competing worldviews that have been generated by the perceived flaws of this perspective Examination of crucial policy issues is incorporated throughout the text restoring the relevance of theory for those who wish to understand those policy issues Moreover this book revitalises the *raison d'être* of contemporary IR theory and shows the role it can play in making sense of the twenty first century

China's Rise and Rethinking International Relations Theory Chengxin Pan, Emilian Kavalski, 2022-02-16 Bringing together leading scholars from Asia and the West this book investigates how the dynamics of China's rise in world politics contributes to theory building in International Relations IR The book demonstrates how the complex and transformative nature of China's advancement is also a point of departure for theoretical innovation and reflection in IR more broadly In doing so the volume builds a strong case for a genuinely global and post Western IR It contends that non Western countries should not only be considered potential sources of knowledge production but also original and legitimate focuses of IR theorizing in their own right

Rethinking International Relations Fred Halliday, 1994 Rethinking International Relations is both an argument for a fresh theoretical approach to International Relations and an application of that theory to the changes in the international system brought about by the end of the Cold War Fred Halliday's wide ranging review identifies an impasse in International Relations theory if debate has long revolved around the question of the state and around a set of methodological issues Halliday seeks to break through this double impasse by a new theorization of the role of the state and by a critique of major contenders in the analytic field English realism American behaviouralism neo realism and post modernism

International Political Theory Kimberly

Theory William E. DeMars,Dennis Dijkzeul,2015-02-11 It has become commonplace to observe the growing pervasiveness and impact of Non Governmental Organizations NGOs And yet the three central approaches in International Relations IR theory Liberalism Realism and Constructivism overlook or ignore the importance of NGOs both theoretically and politically Offering a timely reappraisal of NGOs and a parallel reappraisal of theory in IR the academic discipline entrusted with revealing and explaining world politics this book uses practice theory global governance and new institutionalism to theorize NGO accountability and analyze the history of NGOs This study uses evidence from empirical data from Europe Africa Latin America the Middle East and Asia and from studies that range across the issue areas of peacebuilding ethnic reconciliation and labor rights to show IR theory has often prejudged and misread the agency of NGOs Drawing together a group of leading international relations theorists this book explores the frontiers of new research on the role of such forces in world politics and is required reading for students NGO activists and policy makers *The Realist Tradition in International Relations*

Barry Scott Zellen,2011-08-19 This comprehensive foundation for the study of realism will introduce students in disciplines as varied as philosophy international relations and strategic studies to the majestic breadth of the realist tradition that unifies them all *The Realist Tradition in International Relations* The Foundations of Western Order introduces the principal theorists who have shaped and defined the realist tradition This once dominant theory of international politics has reemerged

to provide a shared foundation for understanding political theory international relations theory and strategic studies The work is comprised of four volumes each focusing upon a distinct period and the pivotal contributors writing in that era Volume 1 State of Hope looks at the classical era when chaos reigned supreme Volume 2 State of Fear goes through the early modern period and the emergence of the modern state Volume 3 State of Awe explores the age of total war with its unprecedented dangers Volume 4 State of Siege examines the present era of insurgency and asymmetrical conflict A truly monumental work this sweeping study will surely foster a new appreciation of the rich tapestry of realist thought and its continuing relevance to the study of world politics

Postpositivist International Relations Theory Amartya Mukhopadhyay, 2023-10-16 This book discusses postpositivist theories foregrounding postpositivism against the reigning realist and positivist pluralist orthodoxies The book explicates seven theories not as disparate endeavours but as developments linked by a common thread that seeks to enunciate globalist emancipatory goals for the theoretical field and the world that these theories seek to change It focuses on the following themes feminism environmentalism or green theory the English School critical theory constructivism postmodernism and postcolonialism Additionally a separate chapter on globalization shows that while mainstream neo realist international relations theories respond hostilely to globalization and liberal pluralist theories react benignly to it postpositivist theories positively welcome it The book offers a competent meta theoretical gridwork showing on which side of the opposing disciplinary positions in the fourth debate each of the seven theories are located It is a comprehensive guide to the postpositivist restructuring of the discipline of international relations This book will be of interest to researchers and students of political science international relations history humanities and literature

Rethinking the New World Order Georg Sørensen, 2016-08-29 The end of the Cold War gave rise to much talk of a new global order and debate about just how new or orderly it was and would be Attempts to analyse the nature of this order have been many and various This important new text assesses the main approaches and offers its own analysis arguing that while chaos and raw anarchy are not on the cards each of the major domains of power security economics institutions and values contains elements of potentially major instability Interstate war may be receding but there are no simple solutions to comprehensive violent conflict inside fragile states and the non democratic great powers continue to have major regional ambitions There is a global liberal market economy but it is increasingly unequal and its financial infrastructure remains fragile and crisis prone There is a comprehensive set of international institutions but they are rather weak and in need of reform Liberal values are nominally endorsed by most states but they are in internal conflict and make up no firm basis for a stable world order Finally world order is threatened from within because the social compacts political infrastructures and national economic capacities of many states will decline This will have negative consequences for the willingness to bring

about effective global governance The result may be a destructive dynamic which might take us towards a Hobbesian world in ways which Hobbes himself had never imagined
