

A man with short dark hair and a light beard is sitting on a wooden bridge railing. He is wearing a dark blue button-down shirt and dark pants. He is looking directly at the camera with a slight smile. The background shows a body of water, green trees, and a white railing with black lanterns. A quote is overlaid on the left side of the image.

"Using this technology, some forms of blindness may be curable, including macular degeneration and Stargardt disease, a currently untreatable form of eye disease that causes blindness in teenagers and young adults."

Robert Lanza Biocentrismo:

Beyond Biocentrism Robert Lanza, Bob Berman, 2016-05-03 Biocentrism shocked the world with a radical rethinking of the nature of reality But that was just the beginning In *Beyond Biocentrism* acclaimed biologist Robert Lanza one of TIME Magazine's 100 Most Influential People in 2014 and leading astronomer Bob Berman take the reader on an intellectual thrill ride as they re-examine everything we thought we knew about life death the universe and the nature of reality itself The first step is acknowledging that our existing model of reality is looking increasingly creaky in the face of recent scientific discoveries Science tells us with some precision that the universe is 26.8 percent dark matter 68.3 percent dark energy and only 4.9 percent ordinary matter but must confess that it doesn't really know what dark matter is and knows even less about dark energy Science is increasingly pointing toward an infinite universe but has no ability to explain what that really means Concepts such as time space and even causality are increasingly being demonstrated as meaningless All of science is based on information passing through our consciousness but science hasn't the foggiest idea what consciousness is and it can't explain the linkage between subatomic states and observation by conscious observers Science describes life as a random occurrence in a dead universe but has no real understanding of how life began or why the universe appears to be exquisitely designed for the emergence of life The biocentrism theory isn't a rejection of science Quite the opposite Biocentrism challenges us to fully accept the implications of the latest scientific findings in fields ranging from plant biology and cosmology to quantum entanglement and consciousness By listening to what the science is telling us it becomes increasingly clear that life and consciousness are fundamental to any true understanding of the universe This forces a fundamental rethinking of everything we thought we knew about life death and our place in the universe **Neuro-Emotional**

Transformation Claudia Vece, 2021-11-11 How nice would it be if in just five minutes we were able to pass from an emotional state of malaise to one of wellbeing What would our life therefore be like if we had the strategies to quickly transform states of stress anxiety uncertainty or fear into states of joy determination and confidence And how would our days be if we were able to calm recurring negative thoughts so as to access a mental space of tranquility and serenity with ease When disempowering thoughts and emotions dominate our days we no longer have energy and psycho-emotional space to dedicate to our goals Suffocated by the grip of malaise our vitality motivation and focus are simply lacking giving way to a sometimes dissatisfied and pessimistic personality A question therefore arises spontaneously How is it that in the world there are people that manage to always see the glass as half full so as to enable their optimism to attract favorable opportunities and circumstances The secret to becoming an architect of your own reality lies in transforming your psycho-emotional state into wellbeing and potential In this book I will reveal to you how to transform your personal reality starting from enriching and empowering your thoughts and emotions so as to increase your personal wellbeing and your attraction potential through Neuro-Emotional Education **WHY TRANSFORM YOURSELF** The true meaning of personal transformation The importance of
