*Managing Maritime Safety* Helle Oltedal, Margareta Lützhöft, 2018-01-23 Shipping is a pillar of global trade with 90 per cent of the world's trade in goods and raw materials carried by ship. Despite the economic benefits this delivers, maritime operations can be dangerous and when accidents occur the consequences are serious. Consequential outcomes from hazards at sea include serious injury, death, loss of cargo and destruction of the marine environment. *Managing Maritime Safety* will give you a thorough understanding of contemporary maritime safety and its management. It provides varying viewpoints on traditional safety topics in conjunction with critical discussions of the international safety management code and its application. The book also offers new perspectives on maritime safety such as ship and equipment design for safety and the relevance of safety management systems in particular the application of the International Safety Management code to remote controlled or autonomous ships. The authors all work in the maritime industry as practitioners in education, research, government and classification. The combination of wide ranging and extensive experience provides an unprecedented span of views with a strong connection to the real issues in the maritime domain. This book sets out to provide much needed consolidated knowledge for university level students on maritime safety management incorporating theoretical, historical, research, operational and design perspectives.

**Maritime Autonomous Surface Ships (MASS) - Regulation, Technology, and Policy** Chong-Ju Chae, Raphael Baumler, 2024-12-01 This book covers MASS regulation, technology and policy. MASS development began with the realization of the 4th industrial revolution technologies such as big data, AI, IoT and communication which were also linked to technological development in the maritime field. However, it is still unclear how MASS will operate. This book is divided into three parts: MASS regulation, technology and policy, and explains each part in detail. Part I: MASS regulation and safety deals with IMO works for MASS including IMO MASS RSE results which has been finished in 2021. In addition, the United Nations Convention on the Law of the Sea (UNCLOS), one of the most important international conventions to be considered for MASS operation, will be dealt with and various safety considerations will be explained in detail. Through this, this book explains in detail the regulatory considerations and safety considerations for MASS. In particular, the gaps and themes identified in IMO MASS RSE and the priority discussion needs are explained and based on this, the development of a goal-based non-mandatory MASS code currently in progress is discussed. UNCLOS is a convention like the blueprint of the IMO Conventions and it is very important to understand and meet the requirements of UNCLOS for the operation of MASS. Therefore, this book provides a detailed explanation of the application of UNCLOS. In particular, UNCLOS Article 94 would be a very important consideration. Also, this book covers COLREGs and technologies for MASS operations.
