

Science in Everyday Life

Science is a great aid to modern life. A modern man lives on the lap of science. This is his help-mate and companion in his daily life. The numerous gifts of science bless him from the early morning till the late night. He begins his morning with the alarm clock, the toothbrush, the tap water, the cup of tea and the newspaper. They are all the results of the great inventions of science. Again, his dress, vehicles, telephone and cooking appliances are all operated by science. When he feels sick, the wonderful drugs of science relieve him. When he feels tired, radio, cinema and television cheer him up. These are all mighty creations of science. Modern life is impossible without them.

Hayek, 2024-05-31 A deft selection of unpublished and little known works by F A Hayek that will serve to enlighten and enliven debates around the ever changing face of Western liberalism Across seventeen volumes to date the University of

Chicago Press's Collected Works of F. A. Hayek series has anthologized the diverse and prolific writings of the Austrian economist synonymous with classical liberalism. *Essays on Liberalism and the Economy* traces the author's long and evolving writings on the cluster of beliefs he championed: most liberalism, its core tenets, and how its tradition represents the best hope for Western civilization. This volume contains material from almost the entire span of Hayek's career: the earliest from 1931 and the last from 1984. The works were written for a variety of purposes and audiences and they include, along with conventional academic papers, encyclopedia entries, after-dinner addresses, a lecture for graduate students, a book review, newspaper articles, and letters to the editors of national newspapers. While many are available elsewhere, two have never appeared in print and two others have not been published in English. The varied formats collected here are enriched by Hayek's changing voice at different stages of his life. Some of the pieces resonate as high-minded and noble; some are meant as cuts to intellectuals, a pejorative term when used by Hayek like Keynes and Galbraith. All serve to distill important threads of his worldview.
