Practical experiments in school science lessons and science field trips Great Britain: Parliament: House of Commons: Science and Technology Committee,2011-09-14 This Science and Technology Committee report on practical experiments in school science lessons and science field trips concludes that many students are receiving poor practical science experiences during their secondary school education There was no credible evidence to support the frequently cited explanation of health and safety concerns for a decline in practicals and trips Instead more focus is needed on what happens after teachers have been recruited to the profession knowledge and practical skills must be maintained and developed in order for high quality science education to be delivered High quality science facilities and qualified and experienced technical support are vital A career structure for technical staff should be provided and the government should ensure schools provide science facilities to match its aspirations for science education Practical science is relatively expensive and carries little cachet for parents comparing schools The inspection regime and the requirements set for exam boards should therefore drive higher quality with more and better practical science lessons The Committee also found a lack of coherence in the provision of science educational materials It urges the science community to utilise the STEM directories the online database of STEM enhancement and enrichment activities for schools and colleges and calls on the government to secure the future of the directories which provide vital contacts between schools and scientists Finally the committee urges the government to provide a detailed strategy on how it intends to achieve its ambition to increase participation in school science subjects
