How Shanghai Does It Xiaoyan Liang, Huma Kidwai, Minxuan Zhang, Yinan Zhang, 2016-04-08 The Shanghai basic education system has garnered significant attention since its extraordinary performance in the 2009 and 2012 Programme for International Student Assessment (PISA), a global assessment of 15-year-olds' educational abilities. Among the 65 participating economies in 2012, Shanghai, China, ranked first on all three major domains of PISA: i.e. mathematics, reading, and science. Shanghai also stands out for having the world's highest percentage of resilient students: students from socio-economically disadvantaged backgrounds who emerge as top performers. Shanghai's PISA story has generated intense discussions and diverse speculations in the field of international educational development, and numerous studies have been done in the attempt to unravel the mystery. Missing from the picture, however, is a more comprehensive, systematic, in-depth, and objective rendition of the policies and practices of Shanghai basic education benchmarked against others in key dimensions. This report presents an in-depth examination of how Shanghai scored highest in the areas of reading, science, and mathematics on PISA. It documents and benchmarks key policies in basic Shanghai education, provides evidence on the extent to which these policies have been implemented in schools, and explores how these policies have affected learning outcomes. The report uses PISA 2012 data to analyze Shanghai student achievement variation and to examine the extent school variables may be associated with the variation beyond family and student background. It also uses the World Bank's Systems Approach for Better Education Results (SABER), an existing systems diagnostic and benchmarking tool, as an organizing framework and for data collection. School-based surveys and other existing research shed further light on educational impact and implementation. While the report attempts to adopt a systems approach, particular emphasis is placed on teachers' education, financing, balancing autonomy and accountability, and student assessment.
