during its first forty years The book foregrounds the program's civilian and military features by probing its close relationship with the space program Through nuclear and space technologies India's leaders served the technopolitical aims of economic modernity and the geopolitical goals of deterring adversaries The politically savvy transnationally connected scientists and engineers who steered the program obtained technologies materials and information through a variety of state and nonstate actors from Europe and North America including both superpowers They thus maneuvered around Cold War politics and the choke points of the nonproliferation regime Hyperdiversification increased choices for the leaders of the nuclear program but reduced democratic accountability at home The nuclear program became a consensus enforcing device in the name of the nation Ploughshares and Swords is a provocative new history with global implications It shows how geopolitical and technopolitical visions influence decisions about the nation after decolonization Thanks to generous funding from the Swiss National Science Foundation the ebook editions of this book are available as Open Access volumes from Cornell Open cornellpress.cornell.edu/cornell-open and other repositories

Mirko Brandes, Jennifer Sacheck, 2024-07-24 Globally physical inactivity is on the rise in most countries and according to the WHO it is considered one of the leading major public health risks As children's physical activity behaviors are conveyed into adulthood many interventions focus on establishing healthy physical activity habits in children to prevent the potential negative health outcomes associated with low physical activity over the life course The school environment provides an opportunity to reach the majority of children however physical activity promotion in schools can often be a challenge Barriers to the success of physical activity interventions include the physical social and economic environment competencies and workload of teachers as well as the perception that physical activity may interfere with the primary task of schools which is education Moreover the evaluation of physical activity interventions for children is challenging raising a discussion on how to best evaluate these interventions
