Physical Science for Gr 11 : Physical Science for Grade 11 Theory, Exercises & Practical Investigations (CAPS) J. M. Lucas, 2012

Physical Sciences, 2013 **Science Education and Curriculum in South Africa** Oscar Koopman, 2016-11-01 This book explores the impact of the socio-historical, political and economic environment in South Africa both during and after Apartheid. During this time the South African education system demonstrated an interest in a specific type of knowledge which Koopman refers to as a science of government. This science of government leaves the learners with a blurred understanding of science that is disconnected from external nature and human nature and is presented as a series of abstract concepts and definitions. The book also investigates the dialectical tensions between the science curriculum and the role of the teacher as an active implementer of the curriculum. The book draws on the work of various phenomenological scholars namely Edmund Husserl, Martin Heidegger, Merleau Ponty and Max van Manen to discuss these tensions.

Theory of the Image Thomas Nail, 2019 We live in an age of the mobile image. The world today is absolutely saturated with images of all kinds circulating around the world at an incredible rate. The movement of the image has never been more extraordinary than it is today. This recent kinetic revolution of the image has enormous consequences not only for the way we think about contemporary art and aesthetics but also for art history as well. Responding to this historical moment, *Theory of the Image* offers a fresh new theory and history of art from the perspective of this epoch defining mobility. The image has been understood in many ways but it is rarely understood to be fundamentally in motion. The original and materialist approach is what defines *Theory of the Image* and what allows it to offer the first kinetic history of the Western art tradition. In this book Thomas Nail further develops his larger philosophy of movement into a comprehensive kinesthetic of the moving image from prehistory to the present. The book concludes with a vivid analysis of the contemporary digital image and its hybridity, ultimately outlining new territory for research and

Tomlinson-Clarke,Darren L. Clarke,2016-03-10 The similarities between the United States and South Africa with respect to race power oppression and economic inequities are striking and a better understanding of these parallels can provide educational gains for students and educators in both countries Through shared experiences and perspectives this volume presents scholarly work from U S and South African scholars that advance educational practice in support of social justice and transformative learning It provides a comprehensive framework for developing transformational learning experiences that facilitates leadership for social justice and a deeper understanding of the factors influencing personal national and global identity
