**Review Essay: Poor Economics (Banerjee/Duflo)** Christopher King, 2013-10-07 Literature Review from the year 2013 in the subject Politics Topic Development Politics grade 1 0 Indiana University Department of Political Science course Politics of International Development language English abstract After all we have spent billions of dollars on aid Has it done any good And sadly we don't know And worst of all we will never know Duflo 2010 01 37 Poverty alleviation is a huge humanitarian challenge and also the supreme discipline of some economists The effort to fight poverty had a mixed success so far and scholars claim different reasons for that outcome cf Besley 2012 In *Poor Economics* Abhijit Banerjee and Esther Duflo avoid the often polemic Sachs vs Easterly aid debate and promise a radical rethinking of the way to fight global poverty They make a convincing case about learning on the lives of the poor and the unique choices they have to face in their lives Banerjee Duflo understand how the poor perceive their conditions and come to the decision they make and are therefore able to craft better strategies and interventions that actually help the poor and do not produce unintended consequences By doing that they deliberately target the micro level and leave out the level of politics or institutions which is somewhat problematic to search effective approaches in answers of the smaller questions This essay is structured in the following way After an introduction to the analysis 2 and an overview of Randomized Controlled Trials RCTs the main method of Banerjee Duflo 2 1 the analysis will provide an assessment of key examples of the two scholars research 2 2 Subsequently an evaluation of limitations 2 3 and shortcomings 2 4 of the book will be conducted By evaluating the approach and findings of *Poor Economics* the essay will be able to compare it with other scholarly works 3 A conclusion 4 will summarize the review and end with a personal take on what has been learned through studying the book

**Poverty as Ideology** Andrew Martin Fischer, 2018-12-15 Winner of the International Studies in Poverty Prize awarded by the Comparative Research Programme on Poverty CROP and Zed Books Poverty has become the central focus of global development efforts with a vast body of research and funding dedicated to its alleviation And yet the field of poverty studies remains deeply ideological and has been used to justify wealth and power within the prevailing world order Andrew Martin Fischer clarifies this deeply political character from conceptions and measures of poverty through to their application as policies Poverty as Ideology shows how our dominant approaches to poverty studies have in fact served to reinforce the prevailing neoliberal ideology while neglecting the wider interests of social justice that are fundamental to creating more equitable societies Instead our development policies have created a poverty industry that obscures the dynamic reproductions of poverty within contemporary capitalist development and promotes segregation in the name of science and charity Fischer argues that an effective and lasting solution to global poverty requires us to reorient our efforts away from current fixations on productivity and towards more equitable distributions of wealth and resources This provocative work offers a radical new approach to understanding poverty based on a comprehensive and accessible critique of key concepts and research methods It upends much of the received wisdom to provide an invaluable resource for students teachers and researchers across the social sciences *The American economic review*, 1928
