Revue Alpine 19:

Geographers Hayden Lorimer, Charles W. J. Withers, 2013-09-12 This volume of Geographers Biobibliographical Studies brings together essays on four Frenchmen a Czech and three Englishmen The lives of our subjects extend from the late Enlightenment and the era of polite science in Regency Britain to the first decade of the 21st century These geographers and their studies are linked not only in their regional expertise from Brazil French Indo China to Scandinavia and South Africa but also by their commitment to the development of geography as a science and as a discipline Here in different settings and at different times we can see how the lived experience of geographers lives shaped the contours of the subject **The Summits of Modern Man** Peter H. Hansen, 2013-05-14 Mountaineering has served as a metaphor for civilization triumphant A fascinating study of the first ascents of the major Alpine peaks and Mt Everest The Summits of Modern Man reveals the significance of our encounters with the world s most forbidding heights and how difficult it is to imagine nature in terms other than conquest and domination **Ecoregionalism** Jon Marco Church, 2020-05-25 This book provides a comprehensive understanding of environmental regionalism at the international level analyzing the concept and identifying recurring patterns from six in depth case studies While ecoregions or environmental regions are defined on ecological boundaries rather than administrative criteria ecoregionalism is the idea that regional dynamics should cluster around ecoregions while ecoregionalization is the tendency of regional dynamics to cluster around ecoregions Focusing on the international level this book presents six cases of ecoregional processes from around the world and the regional environmental agreements two are terrestrial the Alps and the Andes two are marine the Mediterranean Sea and the Baltic Sea two are related to freshwater ecosystems the Amu Darya in Central Asia and the Great Lakes in North America The book analyzes both ecoregional processes focused on the environment as well as intersectoral ecoregional processes The case studies are analyzed based on the ecoregional governance framework developed by the author for this book Despite the diversity of context the similarity of the governance system of the six cases is striking Several recurring patterns have been identified which may also extend to the subnational level They are not design principles but may be taken into consideration for the design or redesign of current and future regional environmental agreements and processes This book will be of great interest to students and scholars of environmental politics natural resource management spatial planning and international relations *The Photographs of Édouard Baldus* Malcolm R. Daniel, Édouard Baldus, Barry Bergdoll, 1994 This book the first to chronicle the life and career of this important artist brings his work once more before the public Themes in the Historical Geography of France Hugh D. Clout, 2013-10-02 Themes in the Historical Geography of France compiles several selected themes in the historical geography of France This book discusses the practice of historical geography in France peopling and the origins of settlement early urban development and retreat of rural settlement The regional contrasts in agrarian structure reclamation of coastal marshland petite culture on 1750 1850 and reclamation of wasteland during the

18th and 19th centuries are also elaborated This compilation likewise covers the historical geography of Western France urban growth on 1500 1900 and agricultural change and industrial development in the 18th and 19th centuries This publication is beneficial to historians and geographers aiming to acquire knowledge of the historical geography of France

SIPRE Report ,1973 **Geography in France** Emmanuel de Martonne,1924 **La Géologie de Québec** Québec (Province). Bureau of Mines,1941 **Urbanizing the Alps** Fiona Pia,2019-01-14 For plenty years many popular mountain resorts have seen largely uncontrolled development consisting of the multiplication of archetypal chalet style houses This is usually accompanied by roadbuilding for private cars In order to protect these tourist destinations and their natural environs from further uncontrolled development the author investigates different settlement structures such as Andermatt Avoriaz Verbier Zermatt and Whistler Blackcomb On the basis of detailed graphical analyses she develops groundbreaking strategies for urban densification and suitable mobility management which can also be transferred to other tourist areas

Geohazards in European Geoparks Xavier MIR PELLICER,Ahmet Serdar AYTAÇ,Alessia AMORFINI,Serge DELABY,2024-02-27 **La Géologie de Québec** John Alexander Dresser,Theophile Constant Denis,1941 **Union List of Serials in Libraries of the United States and Canada** ,1961 **Mountainscapes** Andrea Boscoboinik,Viviane Cretton,2025-09-01 Often home to rural indigenous communities mountain regions are rapidly becoming preserves for the social elite and altogether unsustainable within the climate crisis Bringing together scholars from geography sociology anthropology history and urban studies Mountainscapes seeks to re examine the dynamics of mountain mobilities and better understand how tourism migration and pastoralism impacts mountain communities Ranging from the Swiss Alps to the Chilean Andes this volume illuminates how the processes of place making and non belonging specifically manifest and evolve within our ever changing mountain regions **Research Catalogue of the American Geographical Society** American Geographical Society of New York,1962 **Reader's Guide to Periodical Literature Supplement** ,1922 **Little Ice Ages Vol2 Ed2** Jean M Grove,2013-08-21 Since The Little Ice Age was published in 1988 interest in climatic history has grown rapidly and research in the area has flourished A vast amount of new data has become available from sources such as ice cores speleothems and tree rings The picture that we have of past climates and glacier oscillations has extended further into the past and has become more detailed However the knowledge of climate change on the decennial and centennial timescale to which glacier history can contribute is scarce and is in demand when attempting to predict future change especially with regard to global warming New chapters and material have been included throughout the book which tend to confirm and elaborate on the conclusions of the first edition The glacial evidence has been presented in the context of the oceanographic and icecap studies that have provided such exciting results Little Ice Ages is structured in three parts Part 1 details the evidence for glacier variations in the last thousand years in different parts of the world and the associated climatic fluctuations Part 2 brings together the evidence for the timing of glacier variations in the course of the Holocene Part 3 views

the Holocene record in a longer time context especially as it appears in ice cores and goes on to consider the likely causes of climatic variability on a Little Ice Age timescale and some of its physical biological and human consequences It becomes apparent in Little Ice Ages that the glacier record provides a valuable indication of the nature of climatic fluctuations on the land areas of the globe The record points to periods of cooling which were more numerous and less continuous than was believed to be the case twenty years ago There appears to be no single explanation for the variability Volcanism solar variability and ocean currents have all played their parts and prediction continues to present many problems Some authorities have thrown doubt on the existence of the Little Ice Age but Little Ice Age makes the case for a climatic sequence that can usefully be called the Little Ice Age and which had predecessors occurring at intervals of several centuries throughout much of the last 10 000 years *Little Ice Ages* Jean M. Grove,2004 This concise and accessible new text offers original and insightful analysis of the policy paradigm informing international statebuilding interventions The book covers the theoretical frameworks and practices of international statebuilding the debates they have triggered and the way that international statebuilding has developed in the post Cold War era Spanning a broad remit of policy practices from post conflict peacebuilding to sustainable development and EU enlargement Chandler draws out how these policies have been cohered around the problematization of autonomy or self government Rather than promoting democracy on the basis of the universal capacity of people for self rule international statebuilding assumes that people lack capacity to make their own judgements safely and therefore that democracy requires external intervention and the building of civil society and state institutional capacity Chandler argues that this policy framework inverts traditional liberal democratic understandings of autonomy and freedom privileging governance over government and that the dominance of this policy perspective is a cause of concern for those who live in states involved in statebuilding as much as for those who are subject to these new regulatory frameworks Encouraging readers to reflect upon the changing understanding of both state society relations and of the international sphere itself this work will be of great interest to all scholars of international relations international security and development **Geological Report** Québec (Province).
