The Graduate Student's Guide to Numerical Analysis '98 Mark Ainsworth, Jeremy Levesley, Marco Marletta, 2012-12-06

The Eighth EPSRC Numerical Analysis Summer School was held at the University of Leicester from the 5th to the 17th of July 1998 This was the third Numerical Analysis Summer School to be held in Leicester The previous meetings in 1992 and 1994 had been carefully structured to ensure that each week had a coherent theme For the 1998 meeting in order to widen the audience we decided to relax this constraint Speakers were chosen to cover what may appear at first sight to be quite diverse areas of numerical analysis However we were pleased with the extent to which the ideas cohered and particularly enjoyed the discussions which arose from differing interpretations of those ideas We would like to thank all six of our main speakers for the care which they took in the preparation and delivery of their lectures In this volume we present their lecture notes in alphabetical rather than chronological order Nick Higham Alastair Spence and Nick Trefethen were the speakers in week 1 while Bernardo Cockburn Stig Larsson and Bob Skeel were the speakers in week 2 Another new feature of this meeting compared to its predecessors was that we had invited seminars A number of established academics based in the UK were asked to participate in the afternoon seminar program

The Student's Guide to Social Neuroscience Jamie

Ward, 2013-12-19 Shortlisted for the British Psychological Society Book Award 2013 Social neuroscience is an expanding field which by investigating the neural mechanisms that inform our behavior explains our ability to recognize understand and interact with others Concepts such as trust revenge empathy prejudice and love are now being explored and unraveled by the methods of neuroscience Many researchers believe that evolutionary expansion of the primate and human brain was driven by the need to deal with social complexity not only to understand and outwit our peers but to take advantage of the benefits of cooperative living But what kind of brain based mechanisms did we end up with Special routines for dealing with social problems or more general solutions that can be used for non social cognition too How are we able to sacrifice our own self

interests to respond to the needs of others How do cultural differences in the organization of society shape individual minds and brains and does the brain provide constraints on the possible range of cultural permutations The Student s Guide to Social Neuroscience explores and explains these big issues using accessible examples from contemporary research The first book of its kind this engaging and cutting edge text is an ideal introduction to the methods and concepts of social neuroscience for undergraduate and postgraduate students in fields such as psychology and neuroscience Each chapter is richly illustrated in attractive full color with figures boxes and real world implications of research Several pedagogical features help students engage with the material including essay questions summary and key points and further reading This book is accompanied by substantial online resources that are available to qualifying adopters *Resources in Education*, 1998-04
