Richard J A Talbert Book:

Challenges of Mapping the Classical World Richard J.A. Talbert, 2018-09-04 Challenges of Mapping the Classical World collects together in one volume fourteen varied items written by Richard Talbert over the past thirty years. They cohere around the theme of mapping the classical world since the nineteenth century. All were originally prompted by Talbert's commission in the late 1980s to produce a definitive classical atlas after more than a century of failed attempts by the Kiepert and others. These he evaluates as well as probing the Smith Grove atlas, a successful twenty-year initiative launched in the mid 1850s with a cartographic approach that departs radically from established practice. Talbert's initial vision for the international collaborative project that resulted in the Barrington Atlas of the Greek and Roman World 2000 is presented and the successive twice yearly reports on its progress from 1991 through to completion are published here for the first time. A further item reflects retrospectively on the project's cartographic challenges and on how developments in digital map production were decisive in overcoming them. This volume will be invaluable to anyone with an interest in the development and growing impact of mapping the classical world.

Atlas of Classical History Richard J.A. Talbert, 2002-09-11 From the Bronze Age to the reign of Constantine the Atlas of Classical History provides a comprehensive series of maps, diagrams and commentary designed to meet the needs of classical scholars as well as general readers. Over 135 maps of the Greek and Roman worlds clearly mark the political affiliations of the cities and states, major military events, trade routes, artistic, cultural and industrial centers and colonization and exploration.

Roman Portable Sundials Richard J. A. Talbert, 2020-02-02 In an unscientific era when maps were rarities, how did ancient Romans envisage their far-flung empire? This was done by various means, for certain including with the aid of an ingenious type of portable sundial that has barely attracted notice. As the Romans understood before the first century BCE to track the passage of the sun across the sky hour by hour, one needed to know one's latitude and the time of year and that furthermore sundials did not have to be fixed objects. These portable instruments, crafted in bronze, were adjustable for the changes of latitude to be expected on long journeys, say for instance from Britain to Spain or from Alexandria to Rome or even on a Mediterranean tour. For convenient reference, these sundials incorporated lists of twenty to thirty names of cities or regions, each with its specific latitude. One of the insights of Roman Portable Sundials is that the choice of locations offers unique clues to the mental world map and self-identity of individuals able to visualize Rome's vast empire latitudinally. The sixteen such sundials known to date share common features but designers also vied to create enhancements. Comparison with modern calculations shows that often the latitudes listed are incorrect, in which case the sundial may not perform at its best. But then the nature of Romans' time consciousness or lack of it must be taken into consideration. Richard Talbert suspects that owners might prize these sundials not so much for practical use but rather as prestige objects attesting to scientific awareness as well as imperial mastery of time and space. In retrospect, they may be seen as Roman precursors to comparable Islamic and European instruments from the Middle Ages.

onwards and even to today's luxury watches which display eye-catching proof of their purchasers' wealth, sophistication and cosmopolitanism. Richly enhanced with detailed photographs, line drawings, maps, a gazetteer and a table of latitudes and locations, Roman Portable Sundials brings these overlooked gadgets out of the shadows at last to reveal their hitherto untapped layers of meaning.

Barrington Atlas of the Greek and Roman World Richard J.A. Talbert, 2000-10-08

In 102 full-color maps spread over 175 pages, the Barrington Atlas re-creates the entire world of the Greeks and Romans from the British Isles to the Indian subcontinent and deep into North Africa. It spans the territory of more than 75 modern countries. Its large format (13 1/4 x 18 in or 33 7/8 x 46 4/5 cm) has been custom-designed by the leading cartographic supplier MapQuest.com Inc. and is unrivaled for range, clarity and detail. Over 70 experts, aided by an equal number of consultants, have worked from satellite-generated aeronautical charts to return the modern landscape to its ancient appearance and to mark ancient names and features in accordance with the most up-to-date historical scholarship and archaeological discoveries. Chronologically, the Barrington Atlas spans archaic Greece to the Late Roman Empire, and no more than two standard scales (1:500,000 and 1:1,000,000) are used to represent most regions. Since the 1870s, all attempts to map the classical world comprehensively have failed. The Barrington Atlas has finally achieved that elusive and challenging goal. It began in 1988 at the University of North Carolina, Chapel Hill, under the direction of the distinguished ancient historian Richard Talbert, and has been developed with approximately \$4.5 million in funding support. The resulting Barrington Atlas is a reference work of permanent value. It has an exceptionally broad appeal to everyone worldwide with an interest in the ancient Greeks and Romans: the lands they penetrated and the peoples and cultures they encountered in Europe, North Africa, and Western Asia. Scholars and libraries should find it essential. It is also for students, travelers, lovers of fine cartography, and anyone eager to retrace Alexander's eastward marches, cross the Alps with Hannibal, traverse the Eastern Mediterranean with St. Paul, or ponder the roads, aqueducts, and defense works of the Roman Empire. For the new millennium, the Barrington Atlas brings the ancient past back to life in an unforgettably vivid and inspiring way.

Map by Map Directory: A Map by Map Directory to the Barrington Atlas is available online: http://assets.press.princeton.edu/B_ATLAS/B_ATLAS.PDF and in a separate two-volume print edition of close to 1,500 pages. The Directory is designed to provide information about every place or feature in the Barrington Atlas. The section for each map comprises a concise text drawing attention to special difficulties in mapping a region, such as extensive landscape change since antiquity or uneven modern exploration; a listing of every name and feature on the map with basic data about the period of occupation, the modern equivalents of ancient placenames, the modern country within which they are located, and brief references to relevant ancient testimony or modern studies; a bibliography of works cited. The Map by Map Directory is an essential accompaniment to the Barrington Atlas. As a uniquely rich, comprehensive, up-to-date distillation of evidence and scholarship, it has no match elsewhere and opens the way to an immense variety of further research initiatives.

sometimes unknowing role and he reveals that the World Wide Web is just the latest step in the development of this brain. These are theories as important as they are radical. Informed by twenty years of interdisciplinary research, Bloom takes us on a spellbinding journey back to the big bang to let us see how its fires forged primordial sociality. As he brings us back via surprising routes, we see how our earliest bacterial ancestors built multitrillion member research and development teams a full 3.5 billion years ago. We watch him unravel the previously unrecognized strands of interconnectedness woven by crowds of trilobites, hunting packs of dinosaurs, feathered flying lizards, gathered in flocks, troops of baboons making communal decisions, and adventurous tribes of protohumans spreading across continents but still linked by primitive forms of information networking. We soon find ourselves reconsidering our place in the world. Along the way, Bloom offers us exhilarating insights into the strange tricks of body and mind that have organized a variety of life forms: spiny lobsters which during the Paleozoic age participated in communal marching rituals, and bees which during the age of dinosaurs conducted collective brainwork. This fascinating tour continues on to the sometimes brutal subculture wars that have spurred the growth of human civilization since the Stone Age. Bloom shows us how culture shapes our infant brains, immersing us in a matrix of truth and mass delusion that we think of as reality. Global Brain is more than just a brilliantly original contribution to the ongoing debate on the inner workings of evolution. It is a grand vision, says the eminent evolutionary biologist David Sloan Wilson, a work that transforms our very view of who we are and why.

The Ship of State Norma Thompson, 2008-10-01. This provocative and illuminating book provides a new perspective on the development of political thought from Homer to Machiavelli, Tocqueville, and Gertrude Stein, who is introduced here for the first time as a writer of political significance. Providing nuanced readings of key texts by these and other thinkers, Norma Thompson locates a powerful theme that the political health of organized political communities from the ancient polis to the modern state to contemporary democracy requires a balance between masculine and feminine qualities. Although most critics view the Western tradition as a progression away from misogyny and toward rights for women, Thompson contends that the need for balance in the political community was well understood in earlier eras. Only now has it been almost entirely overlooked in our focus on surface indications of strict gender equality. Thompson argues that political rhetoric must once again promote the reconciliation of masculine and feminine forces in order to achieve effective politics and statecraft.

The Peloponnesian War Lawrence Tritle, 2004-11-30. The Peloponnesian War resonates with contemporary events like few other episodes in ancient history. Though a democracy, Athens warred with its neighbors for decades in a doomed bid to secure its Aegean and Mediterranean empire. The ambitious city state's eventual reward was defeat and tyrannical rule, effectively ending Athens's Golden Age which flourished during the war in the fifth century BC. Not coincidentally did Athens flourish economically, militarily, artistically, and philosophically during the fifth century BC. Empire created great wealth which supported the then novel democratic government. Wealth also supported the arts and letters. This was the time of Socrates, Plato, Aristophanes,

Perikles and Thucydides figures whose works and musings on war and its effects are widely read to this day Designed as an accessible introduction to this immensely important event The Peloponnesian War offers readers and researchers an appealing mix of descriptive chapters biographical sketches and annotated primary documents An overview of the war is presented followed a presentation of Thucydides account of the war s causes A look at the intertwined some would say poisoned relation of democracy and empire is offered as are chapters on how the war was represented in plays statuary and pottery The ethics of war are delved into by detailing the life teachings and eventual death of Socrates And critically a chapter is devoted to those who most often suffer the harmful consequence of war women A glossary of terms is present as is an annotated timeline maps useful illustrations an annotated bibliography and a thorough index

Encyclopedia of Goddesses and Heroines Patricia Monaghan, 2009-12-18 This two volume set provides a comprehensive guide to the vast array of feminine divine figures found throughout the world Drawn from a variety of sources ranging from classical literature to early ethnographies to contemporary interpretations the Encyclopedia of Goddesses and Heroines provides a comprehensive introduction to the ways goddess figures have been viewed through the ages This unique encyclopedia of over thousands of figures of feminine divinity describes the myths and attributes of goddesses and female spiritual powers from around the world The two volume set is organized by culture and religion exploring the role of women in each culture s religious life and introducing readers to the background of each pantheon as well as the individual figures who peopled it Alternative names for important divinities are offered as are lists of minor goddesses and their attributes Interest in women s spirituality has grown significantly over the last 30 years both among those who remain in traditional religions and those who explore spirituality outside those confines This work speaks to them all

The Emergence of Subjectivity in the Ancient and Medieval World Jon Stewart, 2020-03-24 The Emergence of Subjectivity in the Ancient and Medieval World An Interpretation of Western Civilization represents a combination of different genres cultural history philosophical anthropology and textbook It follows a handful of different but interrelated themes through more than a dozen texts that were written over a period of several millennia and by means of an analysis of these texts presents a theory of the development of Western civilization from antiquity to the Middle Ages The main line of argument traces the various self conceptions of different cultures as they developed historically reflecting different views of what it is to be human The thesis of the volume is that through examination of these changes we can discern the gradual emergence of what we today call inwardness subjectivity and individual freedom As human civilization took its first tenuous

steps it had a very limited conception of the individual. Instead the dominant principle was that of the wider group: the family, clan, or people. Only in the course of history did the idea of what we now know as individuality begin to emerge, and it took millennia for this idea to be fully recognized and developed. The conception of human beings as having a sphere of inwardness and subjectivity subsequently had a sweeping impact on all aspects of culture, including philosophy, religion, law, and art. Indeed, this notion largely constitutes what is today referred to as modernity. It is easy to lose sight of the fact that this modern conception of human subjectivity was not simply something given, but rather the result of a long process of historical and cultural development.
