SAVE THESE IMPORTANT SAFETY INSTRUCTIONS

BATTERY WARNINGS

! DANGER !

RISK OF BATTERY EXPLOSION FROM HYDROGEN GAS. MAY RESULT IN BLINDNESS, SERIOUS INJURY, PERMANENT DISFIGUREMENT AND SCARRING.

ALWAYS assume that any battery might explode when you least expect it. Wear safety glasses for your protection.

Batteries generate explosive hydrogen gas, even during normal operation. People have been injured by battery parts flying in an explosion. They can explode under normal operating conditions, such as starting your car. They can explode under abnormal conditions, such as jump starting, or if short circuited by a tool. They can explode in a parked car or sitting on a table.

To help reduce the risk of these dangers and injury, it is of the utmost importance that each time before using your charger, you read and understand this manual, and any warnings and instructions by the battery manufacturer. Follow these instructions exactly.

TO HELP REDUCE THIS RISK:

1. Wear Personal Protective Equipment

- **ALWAYS** wear complete eye protection (THAT PROTECTS EYES FROM ALL ANGLES).

2. Avoid Flames and Sparks Near Battery and Fuel

- **ALWAYS** keep flames, matches, lighters, cigarettes or other ignition sources away from battery.
- **DO NOT** put flammable material on or under charger. **DO NOT** use near gasoline vapors.
- Make sure charger clips make good contact by twisting or rocking them back and forth several times. The second clip connection **MUST ALWAYS** be made away from the battery. **ALWAYS** plug charger into an electrical outlet **AFTER** all connections have been made. See OPERATING INSTRUCTIONS.
- If necessary to remove battery from vehicle to charge, **ALWAYS** turn off all accessories in the vehicle. Then **ALWAYS** remove grounded terminal (connected to car frame) from battery first.
- A tool touching both battery posts or battery post and car metal parts is a short circuit and will spark. If/when using metal tools on or near battery be extra cautious to reduce risk of short-circuit, possibly causing a battery explosion. **DO NOT** drop a tool on battery.

3. Reduce Explosive Gas (Hydrogen)

- Before connecting charger, **ALWAYS** add water to each cell until battery acid covers plates to help purge extra gas from cells. **DO NOT** overfill. Battery acid expands during charge. After charging fill to level specified by battery manufacturer. For a battery without removable caps (maintenance free battery), carefully follow manufacturer's instructions on charging.
- Some sealed maintenance free batteries have a battery condition indicator. A light or bright colored dot indicates low water. Such a battery needs to be replaced, not charged or jump started.
- Charge battery with caps in place. Most U.S. batteries are made with flame arresting caps. **DO NOT** pry caps off sealed batteries. Place wet cloth on batteries with non-flame arresting caps.
- Be sure area around battery is well ventilated before and during charging process. **NEVER** charge in a closed-in or restricted area.

BATTERY CHARGER OPERATING INSTRUCTIONS

4. Stay Away From Battery When Possible

- **NEVER** put face near battery.
- **ALWAYS** locate charger as far from battery as DC cables permit.
- **ALWAYS** keep other people away from the battery. They are not wearing safety glasses like you are.

5. Avoid Contact With Battery Acid

- Battery posts may have acid corrosion. **DO NOT** get corrosion in your eyes. Avoid touching eyes while working near battery.
- **ALWAYS** use a battery carrier. Carrying a battery by hand may put pressure on its ends, causing acid to be forced out vent caps.
- **ALWAYS** have plenty of fresh water and soap nearby in case battery acid contacts eyes, skin or clothing. If battery acid contacts skin or clothing, wash immediately with soap and water. If acid enters eye, immediately flood eye with cold running water for at least fifteen (15) minutes and get medical help immediately.
- In very cold weather a discharged battery may freeze. **NEVER** charge a frozen battery. Gases may form, cracking the case, and spray out battery acid.

6. Avoid Overcharging Batteries

- This non-automatic (manual) battery charger models can overcharge a battery if left connected for an extended period of time, resulting in loss of water and creation of hydrogen gas.

7. Follow Other Manufacturers' Recommendations

- Before using charger, read all instructions for, and caution markings on, (1) charger, (2) battery, and (3) related product using battery. Follow their recommended rate of charge.

ELECTRICAL WARNINGS

! DANGER !

RISK OF ELECTRICAL AND FIRE HAZARD. MAY RESULT IN DEATH, SERIOUS INJURY, SHOCK OR BURNS. TO HELP REDUCE THIS RISK:

This charger, like all electrical products, **MUST** be treated with respect. Follow these instructions to reduce electrical hazard risk.

1. PROPER GROUNDING AND AC POWER CONNECTION

- Charger **MUST** be grounded to reduce risk of electric shock. Charger is equipped with an electric cord having an equipment grounding conductor and a grounding plug. The plug **MUST** be plugged into an outlet that is properly installed and **GROUND**ED in accordance with all local codes and ordinances. If you ever feel even a slight shock from this or any electrical appliances, stop, walk away. Turn off electricity to outlet, and have it inspected by an electrician. You may have a dangerous, improperly wired outlet.
- **DANGER - NEVER** alter AC power cord or plug provided - if it will not fit outlet, have proper outlet installed by a qualified electrician or proceed as shown in the illustration below. Improper connection can result in a risk of an electric shock. This battery charger is for use on a nominal 120-volt circuit (common household current), and has a grounding plug as illustrated. A temporary adapter may be used, USA only, to connect this plug to a two-pole receptacle, as shown, if properly grounded outlet is not available. The temporary adapter should be used only until a properly grounded outlet can be installed by a qualified electrician.
- **DANGER - Before** using adapter as illustrated below, be certain that center screw of outlet plate is grounded. The green colored fold ear or lug extending from adapter **MUST** be connected to a properly grounded outlet - **make certain it is grounded**. If necessary, replace original outlet cover plate screw with a longer screw that will secure adapter ear or lug to outlet cover plate and make ground connection to grounded outlet.
