Laser Physics ,2008 **Proceedings of the International Conference on QCD and Hadronic Physics, Peking University, China, 16-20 June 2005** ,2006 Canadian Journal of Physics ,2014 Physics in Collision 5 B. Aubert, Lucien Montanet, 1986 Australian Journal of Physics ,1998 *Epidemics and Genocide in Eastern Europe, 1890-1945* Paul Weindling, 2000-02-03 During the First World War delousing became routine for soldiers and civilians following the recent discovery that the louse carried typhus germs But how did typhus come to be viewed as a Jewish disease and what was the connection between the anti typhus measures during the First World War and the Nazi gas chambers in the Second World War In this powerful book Professor Weindling draws upon wide ranging archival research throughout East and Central Europe to the United States to provide valuable new insight into the history of German medicine from its response to the perceived threat of typhus epidemics from its Eastern borders He examines how German experts in tropical medicine took an increasingly racialised approach to bacteriology regarding supposedly racially inferior peoples as carriers of the disease So they came to view typhus as a Jewish disease By the Second World War as migrants and deportees had become conditioned to expect the ordeal of delousing at border crossings ports railway junctions and on entry to camps so sanitary policing became entwined with racialisation as the Germans sought to eradicate typhus by eradicating the perceived carriers Typhus had come to assume a new and terrifying genocidal significance as the medical authorities sealed the German frontiers against diseased undesirables from the east and gassing became a favoured means of disease eradication
