Scholarly Research in Music Sang-Hie Lee, 2022-04-28 Scholarly Research in Music Shared and Disciplinary Specific Practices Second Edition offers a comprehensive and detailed guide to engaging in research in all disciplines of music. This second edition continues to provide the foundational principles of research for all musicians including performers, theorists, composers, conductors, music educators, and musicologists. It strengthens the core pedagogical framework of the first edition by offering updated guidance on available technologies, methodologies, and materials. Driven by the rapidly shifting research paradigms within music, sixteen contributors expand the already broad scope of the book with new chapters on research in today's library, neurophenomenology in music, and self-efficacy in music performance, as well as new sections in chapters on philosophy, historical research, social science research, and statistics. Introducing research as a friendly and accessible process, the book engages students in brainstorming a topic, asking pertinent questions, systematically collecting relevant information, analyzing and synthesizing the information, and designing a cohesive research plan to conduct original research. Detailing the methodologies and techniques of both conventional and innovative approaches to music research, Scholarly Research in Music provides an essential grounding for all kinds of music researchers.

Scholarly Research for Musicians Sang-Hie Lee, 2017-01-20 Scholarly Research for Musicians presents a range of research methods and techniques incorporating both the common elements of traditional music research methodologies with innovative research strategies endemic to the fields of social science, education, and performance science. The author's collaborative and interdisciplinary approach reinforces the belief that research is most palpable and successful when accessed through a relevant and meaningful way of organizing thoughts and knowledge. Drawing from over twenty years of classroom experience, the author organizes the text into five units: Common Bases, Qualitative Research, Quantitative Research, Performance Science, and Review. Research is presented as an accessible process, one facilitated by brainstorming and question asking, the systematic collection of information, and the analysis and synthesis of information, all with the aim to develop a succinct conceptual framework. In explicating this process, the author introduces traditional Western thought alongside contemporary and Eastern philosophy. Experts in the field of performance science explore novel approaches to studying the audience, incorporating various measuring devices and methods. In the final chapter, the author offers strategies for disseminating and publishing research reports. Scholarly Research for Musicians demystifies the research process for musicians and music students alike, demonstrating the common principles of cohesive research plans. PowerPoint presentations are available to instructors covering chapter discussion points in summary format. This text explores interdisciplinary methods that merge with and focus on the study of music while emphasizing concepts and materials relevant to all types of research.

Create Your School Library Writing Center Timothy

Horan, 2016-10-16. Colleges typically have writing centers to which students can bring their writing assignments to a peer tutor for assistance, but most high schools and middle schools do not. This book advocates for the creation of writing centers in K-12 schools and explains why the school library is the best place for the writing center. There is a glaring absence of writing centers in today's K-12 schools. More and more students are being asked in college entrance testing to submit samples of their writing, and employers are expecting their workers to write correctly and clearly. This book addresses the critical lack of writing centers below the undergraduate level. It demonstrates how middle school and high school librarians can create writing centers in their school libraries, explains how to assist students through a one-on-one writing tutorial method, and gives students and teachers the tools for learning and understanding the complex art of writing. Author Timothy Horan, inventor of the School Library Writing Center, establishes why school libraries represent the best and most logical places to create writing centers and why school librarians are the natural choice to direct writing center operations. He then takes readers through the process of creating a writing center from original conception up through opening day. Additional topics covered include how to publicize and grow your School Library Writing Center, maintaining your writing center for efficient operation on a daily basis as well as for years to come, how to become an effective writing center director and writing tutor, the most current technology that can be used to assist in the writing composition and research process, and working with English language learner (ELL) students within your writing center. **Handbook of Research on**
