

importance of these outfits. They relate the uniforms to specific academic outcomes and behaviors amongst not just students but also teachers in charge of teaching the students (Jamison, 2006).

A number of researches have been conducted to ascertain the significance of school uniforms. Some researchers have found out that these attires have a considerable impact on the academic performance of students and their behavior as well. Nonetheless, these research findings have been subject to heated debates (Anthony, 2006). Critics have claimed that school uniforms have impacts on neither academic performance nor behavior of students both at school and in their homes. They claim that uniform policies may have adverse effects on student outcomes and school environments by offering a public and visible representation of strict rules and utter control (Wilken, & Van, 2012).

One ought to note that the public policies revolving around education reforms in a number of countries worldwide have placed significant emphasis on the importance of uniform principles in public schools. Traditionally, school uniforms were meant for the private sector and it is only recently that a viable policy was introduced for uniforms in public schools in the United States of America (Jamison, 2006). It is for this reason that public school administrators are now considering uniform policies in a bid to improve the school environment and subsequently the overall performance of the students in these schools. The process is however controversial. Mandatory school uniform policy is controversial in the sense that not everyone shares the idea that it comes with all the good things (Ebert, & Culyer, 2011).
