of expert testimony in these cases and international health medical and marketing issues Broken into thirteen Realizing
an Alternative Political Economy of Sustainability Arturo Hermann,2025-07-25 Engagement with and between a plurality of
progressive non neoclassical traditions is an important step in fostering a more capacious understanding of sustainability
both as a concept and as a political objective To that end this book provides a critical overview of the development of
alternative perspectives on the economics of sustainability highlighting the presence of various strands of heterodox
economics and radical ecology and arguing that greater engagement between these schools of thought is required to help
formulate viable alternatives to the prevailing neoliberal ideology The chapters in Part I of this volume Ecofeminism Social
Ecological Economics Bioeconomics Steady State present a series of concrete policy proposals for building socially just
sustainable socio economic processes Each chapter utilizes the acumen of a given heterodox tradition to formulate policy
reforms to secure this objective In Part II Heterodox Macroeconomics and Sustainability the contributors make the case for
more radical forms of socio economic transformation particularly emphasizing community local and regional level initiatives
for change The final part Circular Economy Civil Economy and Other Heterodox Contributions reflects on the potential
strategic political economic contribution of heterodox economics to building more sustainable and just socio economic
practices in a broader sense These chapters demonstrate that heterodox economics and radical ecology can productively
contribute to realizing sustainability in areas such as economic pedagogy through working in conjunction with other social
justice movements and by challenging extant neoliberal ideologies of sustainability They also deliberate on some of the
institutional and epistemological challenges that confront heterodox practitioners seeking to make such an impact This
volume is essential reading for anyone concerned with a viable alternative conception of the economy and sustainability
including readers from all schools of heterodox economics and radical ecology and people and organizations involved in
various ways in building an alternative political economy of sustainability
