Unit Overview

Trees and Forests 6

Look to the Trees!

Unit Summary

6-28 Describe characteristics of trees and the interactions of trees with other living things in the local environment.

Science and Socials are undergoing a trial change this year. Instead of teaching overlapping units we will use our afternoon blocks to teach science one month and a socials topic the next month. Hopefully this will lead to a more holistic understanding of each unit.

Children have a natural curiosity about their surroundings—a desire to explore and investigate, see inside things, find out how things work and find answers to their questions. Learning about science provides a framework for students to understand and interpret the world around them.

Students learn about trees as individual plants and as part of a forest ecosystem. By examining local species, they learn to recognize the characteristics of different trees and develop skill in describing and interpreting the structural features of trees. As part of their studies, students learn about a broad range of living things found in, under and around trees and study the complex interaction between trees and the larger environment. In examining human use of forests, they become aware of a broad range of environmental issues and develop an awareness of the need for responsible use.

This is a one month theme, directed at a sixth grade audience in the beginning semester of the year. This unit will lead students on a journey of inquiry and problem solving in which they will discover materials new and common in their environment. They will be guided in handling these materials, analyzing research and developing opinions. Students will gather knowledge about the fundamental elements of forestry and tree based environmentalism and the history science. This unit will also focus on developing a stewardship perspective of the scientific world and a conservationist understanding of our place in it. This unit is designed to be an adventure in science, forests and personal understanding.
