Street, Dave Baker, Alison Tomlin, 2006-03-14 Abstract This introduction sets the scene for the remainder of the book by considering first the international context of widespread concern about the improvement of numeracy skills This is related to reform movements

in the UK the US and other countries aimed at modernising primary elementary school mathematics curricula A detailed account is given of the National Numeracy Strategy in England a systemic government imposed response to concern about standards implemented in 1999 2000 This includes a discussion of the alternative meanings of numeracy An earlier initiative sponsored by a UK charitable trust reacting to concern about primary numeracy was the Leverhulme Numeracy Research Programme This large scale longitudinal study and linked set of case study projects focusing on reasons for low attainment took place during 1997 2002 This book and each other in the same series is based on results of that research The timescale fortuitously enabled the research team to also report on some effects of the systemic reform in the National Numeracy Strategy 1 THE INTERNATIONAL CONTEXT In many countries there are recurring periods of national concern about the low standards of calculation skills shown by children in primary elementary schools Recently these concerns have become more urgent and more political with the publication of international comparisons of mathematical achievement first at secondary and more recently at primary level e g Lapointe Mead et al 1992 Mullis et al 1997 Common Sense Mathematics: Second Edition Ethan D. Bolker, Maura B. Mast, 2021-01-21 Ten years from now what do you want or expect your students to remember from your course We realized that in ten years what matters will be how students approach a problem using the tools they carry with them common sense and common knowledge not the particular mathematics we chose for the curriculum Using our text students work regularly with real data in moderately complex everyday contexts using mathematics as a tool and common sense as a guide The focus is on problems suggested by the news of the day and topics that matter to students like inflation credit card debt and loans We use search engines calculators and spreadsheet programs as tools to reduce drudgery explore patterns and get information Technology is an integral part of today's world this text helps students use it thoughtfully and wisely This second edition contains revised chapters and additional sections updated examples and exercises and complete rewrites of critical material based on feedback from students and teachers who have used this text Our focus remains the same to help students to think carefully and critically about numerical information in everyday contexts **Creating Self-Regulated Learners** Linda B. Nilson, 2023-07-03 Most of our students neither know how learning works nor what they have to do to ensure it to the detriment both of their studies and their development as lifelong learners The point of departure for this book is the literature on self regulated learning that tells us that deep lasting independent learning requires learners to bring into play a range of cognitive skills affective attitudes and even physical activities about which most students are wholly unaware and that self regulation which has little to do with measured intelligence can be developed by just about anyone and is a fundamental prerequisite of academic success Linda Nilson provides the theoretical background to student self regulation the evidence that it enhances achievement and the strategies to help students develop it She presents an array of tested activities and assignments through which students can progressively reflect on monitor and improve their learning skills describes how they can be integrated with different course

components and on various schedules and elucidates how to intentionally and seamlessly incorporate them into course design to effectively meet disciplinary and student development objectives Recognizing that most faculty are unfamiliar with these strategies she also recommends how to prepare for introducing them into the classroom and adding more as instructors become more confident using them The book concludes with descriptions of courses from different fields to offer models and ideas for implementation At a time of so much concern about what our students are learning in college and how well prepared they are for the challenges of tomorrow s economy and society self regulated learning provides a reassuring solution particularly as studies indicate that struggling students benefit the most from practicing it

Policies and Practice in Language Learning and Teaching Sabine Doff, Richard Smith, 2025-10-01 This book brings together studies from Georgia Germany Italy Japan New Zealand Poland South Korea and the UK which explore links between policy and practice in language teaching in the twentieth century The 14 contributions set out to expand the remit of grounded history within the field of History of Language Learning and Teaching HoLLT by focusing on language teaching policies and linking these to practices and to contexts situating policy formulation in particular contexts on the one hand and exploring the relationship between policy and practice on the other In this sense the book shows how the theories policy pronouncements curricula textbooks and overall teaching approaches which tend to feature in most histories of language teaching always emerge from particular researchable contexts and in the other direction are interpreted and responded to in practice again in particular contexts In this way it hopes to contribute a context based perspective that highlights diversity of practices in opposition to received views that language teaching methodology is universal and context free
